The End of this Day's Business Katharine Burdekin, 1989 A A Written in 1935 but never published until now this novel depicts a world ruled by women some 4 000 years into the future Men live alone and rear boys in a cheerful atmosphere of sports physical labor and healthy sexuality but without the

consciousness of anxiety or knowledge of history claimed by women The plot of the novel described by Choice as a forgotten masterpiece turns on the desire of one woman to teach her son about the past Risking their lives she tells the story of the rise of fascism and the subsequent world transformation as life loving women took over from death loving men Burdekin's novel is one of the few serious role reversal utopias we have I read it in one sitting Joanna Russ author of *The Female Man*

Women Working In The Environment Carolyn E. Sachs, 2014-02-25 Based on theoretical insights from ecofeminism women and development and postmodernism and the convincing empirical work of numerous scholars this book is organized around five aspects of gender relationships with the environment Part 1 gender divisions of labor Part 2 property rights Part 3 knowledge and strategies for sustainability Part 4 environmental and social movements and Part 5 policy alternatives Examining women's relationship with the environment using these five dimensions provides concrete material examples of how women work with control know and affect the environment and natural resources Bamboo Shoots After the Rain Ann C. Carver, Sung-Sheng Yvonne Chang, 1993-01-01 A short story collection hailed as a welcome and valuable addition to our growing knowledge about the inner lives and literary talents of Chinese women Amy Ling author of *Between Worlds* Women Writers of Chinese Ancestry This remarkable anthology introduces the short fiction of fourteen writers major figures in the literary movements of three generations who represent a range of class ethnic and political perspectives It is filled with unexpected gems such as Lin Hai yin's story of a woman suffering under the feudal system of Old China and Chiang Hsiao yun's optimistic solutions to problems of the elderly in rapidly changing 1980s Taiwan And in between a dozen rich stories of aristocrats comrades wives concubines children mothers sexuality female initiation rape and the tensions between traditional and modern life This is not western feminism with an Asian accent says *Bloomsbury Review* but a description of one culture's reality The woman protagonists survive both despite and because of their existence in a changing Taiwan **Women, Development, and Communities for Empowerment in Appalachia** Virginia Rinaldo Seitz, 1995-01-01 An examination of the class and gender conditions of working class women in the coal mining fields reveals how they struggled for development and change and how the struggle sometimes lead to empowerment Critical Ecofeminism Greta Gaard, 2017-06-16 Australian feminist philosopher Val Plumwood coined the term critical ecofeminism to situate humans in ecological terms and non humans in ethical terms for the two tasks are interconnected and cannot be addressed properly in isolation from each other Various using the terms critical ecological feminism critical anti dualist ecological feminism and critical ecofeminism Plumwood's work developed amid a range of perspectives describing feminist intersections with ecopolitical issues i.e. toxic production and toxic wastes indigenous sovereignty global economic justice species justice colonialism and dominant masculinity Well over a decade before the emergence of posthumanist theory and the new materialisms Plumwood's critical ecofeminist framework articulates an implicit posthumanism and respect for the animacy of all earthothers exposing the linkages among diverse forms of oppression and providing a theoretical basis for further activist coalitions and

interdisciplinary scholarship Had Plumwood lived another ten years she might have described her work as Anthropocene Ecofeminism Critical Material Ecofeminism Posthumanist Anticolonial Ecofeminism all of these inflections are present in her work Here Critical Ecofeminism advances upon Plumwood's intellectual activist and scholarly work by exploring its implications for a range of contemporary perspectives and issues critical animal studies plant studies sustainability studies environmental justice climate change and climate justice masculinities and sexualities With the insights available through a critical ecofeminism these diverse eco justice perspectives become more robust *Homeworkers in Global Perspective* Eileen Boris, Lisa Prugl, 2016-01-28 *Homeworkers in Global Perspective* documents the lives of homeworkers exploring state policies towards them and describing the innovative ways in which homeworkers organize Moving away from well known already explored cases the essays focus on less known but equally compelling examples organize and covers the major geographic regions of the world and illustrates the diversity of home based work and homeworker organizing Feminism and Ecological Communities Christine Cuomo, 2002-09-11 *Feminism and Ecological Communities* presents a bold and passionate rethinking of the ecofeminist movement It is one of the first books to acknowledge the importance of postmodern feminist arguments against ecofeminism whilst persuasively presenting a strong new case for ecological feminism Chris J Cuomo first traces the emergence of ecofeminism from the ecological and feminist movements before clearly discussing the weaknesses of some ecofeminist positions Exploring the dualisms of nature culture and masculinizing feminine that are the bulwark of many contemporary ecofeminist positions and questioning traditional feminist analyses of gender and caring *Feminism and Ecological Communities* asks whether women are essentially closer to nature than men and how we ought to link the oppression of women people of colour and other subjugated groups to the degradation of nature Chris J Cuomo addresses these key issues by drawing on recent work in feminist ethics as well as the work of diverse figures such as Aristotle John Dewey Donna Haraway and Maria Lugones A fascinating feature of the book is the use of the metaphor of the cyborg to highlight the fluidity of the nature culture distinction and how this can enrich ecofeminist ethics and politics An outstanding new argument for an ecological feminism that links both theory and practice *Feminism and Ecological Communities* bravely redraws the ecofeminist map It will be essential reading for all those interested in gender studies environmental studies and philosophy Chicano Culture, Ecology, Politics Devon G. Peña, 1999-01-01 Until recently mainstream American environmentalism has been a predominantly white middle class movement essentially ignoring the class race and gender dimensions of environmental politics In this provocative collection of original essays the environmental dimensions of the Chicana/o experience are explicitly expressed and debated Employing a variety of genres ranging from poetry to autobiography to theoretical and empirical essays the voices in this collection speak to the most significant issues of environmentalism and social justice recognizing throughout the need for a pluralism of Chicana/o philosophies The contributors provide an excellent basis for understanding how multiple Chicana/o views on the environment play out in the

context of dominant social political and economic views Chicano Culture Ecology Politics examines a number of Chicana o ecological perspectives How can the ethics of reciprocity present in Chicana o agropastoral life be protected and applied on a broader scale How can the dominant society whose economic structure is invested in placeless mobility take note of the harm caused to land based cultures take responsibility for it and take heed before it is too late Will the larger society be ecologically housebroken before it destroys its home Grounded in actual political struggles waged by Chicana o communities over issues of environmental destruction cultural genocide and socioeconomic domination this volume provides an important series of snapshots of Chicana o history Chicano Culture Ecology Politics illuminates the bridges that exist and must be understood between race ethnicity class gender politics and ecology

Managing Development Kathleen Staudt, 1991-04-01 The text is illustrated with many development cases hypothetical situations examples and role playing exercises The book is well researched and well written It will be useful to students and teachers of development administration RISA Staudt s very readable text is peppered with numerous illustrative examples from throughout the world including the United States and other developed countries that bring potentially esoteric issues to life Also included are brief case studies role playing exercises and staggered assignments for individual projects that can be used by imaginative instructors to promote hands on involvement An appendix lists other useful sources for case materials and the book contains numerous valuable references to the recent literature on development Gregory D Schmidt Northern Illinois University This book offers interesting features at both the pedagogical and analytical levels The author s interdisciplinary approach as well as her macro and micro perspectives give valuable insight into the highly complex world of the management of development International Review of Administrative Sciences This is a superb text one that will be required reading by all scholars in the field of development It is particularly important for its contribution to recent scholarship and its use of new innovative approaches to development This book is a breath of fresh air in a field full of platitudes and old ideas It will improve both thinking and teaching about development management Jane L Parpart Dalhousie University Nova Scotia Canada Long overdue This text is not only gender sensitive but

interdisciplinary theoretically grounded policy relevant and best of all interesting to read Sue Ellen Charlton Colorado State University While theoretically aware and non aligned to any official agency Staudt s approach to development management is essentially practical and pragmatic Her concern for grassroots participation is combined with a full appreciation of the significance of national and international levels of decision making and implementation and of the roles of both governmental and non governmental organizations In a style that is both direct and clear she informs but does not prescribe about the contexts the techniques the institutions and the sectors in which and with which management operates providing in the process a variety of challenging and realistic case studies She also succeeds admirably in integrating gender as a matter of common sense into the mainstream of international development management concerns David Hirschmann The American University Washington D C This text provides a brilliant juxtaposition of interrelated but hitherto isolated fields in the complex and controversial political economy of development The author brings unique timely insights and formats to bear especially from indigenous Third World activists authors and scholars as well as practitioners She bridges the local and global the political and the technical Her book is particularly welcome at the start of the 1990s as a truly radical departure from the diversions and disappointments of orthodox development administration and structural adjustment Hopefully public policy will not be the same once this text is distributed digested and debated Timothy W Shaw Dalhousie University Nova Scotia Canada Staudt presents a multifaceted comprehensive analysis with illustrative examples drawn from a wide range of countries a worthwhile contribution to recent literature reporting on and assessing the record of governmentally sponsored developmental efforts with a focus on issues of management and administration Woven throughout the text are commendable references to persistent deficiencies such as the dearth of participation by women in development activities and the frequency of a feeling of alienation and distance between institutional staff members and the people they should be serving Another praiseworthy feature is inclusion of many teaching aids such as cases role playing sessions and staggered assignments related to the preparation of individual projects outstanding source for bibliographical information about recent literature on development Public Administration Review A useful book for those involved in development work it moves beyond politics and policy making into organization for action and studies political relationships between people their organizations and the state in development projects Case studies examples and role play exercises are used to build analytic skills Intermediate Technology Bookshop The complexities facing development managers are vast The enormous challenges to understanding the breadth and depth of development transformation are apparent in each level of this process and demand attention Answering the need for a comprehensive introductory resource is Managing Development This fresh perspective on development management analyzes both international and national development agencies and shows the widely differing cultural contexts in which to plan manage and evaluate development programs Stressing political context and process throughout the focus nevertheless in Managing Development is on bureaucratic politics and political

relationships between people their organizations and the state in development programs and projects The chapters examine development programs in agriculture and health particularly reproductive health and provide hypothetical situations examples and roleplay exercises A well integrated treatment of development teaching learning and applications this volume shows that much can be learned from the analysis of both successful and unsuccessful development programs Managing Development is the essential resource for courses in development studies political science comparative politics urban studies and policy studies as well as for planners and researchers in development management

Artisans and Fair Trade Mary A. Littrell, Marsha A. Dickson, 2012-03 Addresses the cultural conditions under which artisan work provides a feasible income alternative to other employment options Offers a methodology for assessing the socio economic impacts of fair trade artisan work After agriculture and tourism artisan work provides the next most significant source of income in many developing countries Yet because of its image as a soft or frivolous industry some politicians and development professionals question whether the handcraft sector is worthy of investment An opposing view holds that the creation of sustainable employment opportunities for poor people and a positive alternative to mass production outweighs the costs Until now the debate has been hampered by a lack of industry data The apparel group MarketPlace Handwork of India serves as the perfect case study to provide this missing information Like many fair trade companies it has dual goals to generate income in the global marketplace and foster the empowerment of the low income workers who run and staff the business In conducting interviews with MarketPlace's artisans managers and founders Littrell and Dickson produced an in depth socio economic audit of the group over time The result *Artisans and Fair Trade* provides a quantitatively and qualitatively illuminating study of fair trade impacts and a methodology that is sure to inform current assessment practices in social entrepreneurship and business social responsibility
