Climates and Societies - A Climatological Perspective M. Yoshino, Manfred Domrös, Annick Douguédroit, J. Paszynski, L.C. Nkemdirim, 2013-06-29 The impact of climate on human activities and the effect of humans on climate are two of the most important areas of inquiry in climatology These interactions conducted through physical chemical and biological processes were described as early as Roman and Greek times Marcus Vitruvius 75 25 B C a famous Roman engineer and architect made the following observation about the climatic conditions necessary for founding a city Land ideal for the health is slightly elevated and there should be neither fog nor frost The direction of the slope and the distance to the swamps lakes and beaches must also be considered The prevailing wind directions observed by a wind tower at the center of the city like Horologium at Athens should be taken into consideration in city planning The main and narrow streets should be placed in the middle angle of the two prevailing wind directions Then the location of the Pantheons and squares should be decided The influence of humans on climate was a major subject for discussion in the 19th century inspired in part by the rapid industrial growth and expanding deforestation of the time D L Howard wrote brilliant pieces on the climate of London in the 1830s while G P Marsh discussed the effects of forests on precipitation in the U S A in the second half of the 19th century *A World Bibliography of Geographical Bibliographies* Takashi Okuno, 1900

EPA-600/5, 1974-02 *The Climate of Cities* James T. Peterson, 1969 **The Quality of the Urban Environment** Harvey S. Perloff, 2015-06-03 The quality of the environment in which people live work and play influences to no small degree

the quality of life itself The environment can be satisfying and attractive and provide scope for individual development or it can be poisonous irritating and stunting The papers in this volume first published in 1969 are concerned with the urban environment in which the majority of Americans live or more accurately with the environment of urbanites for the concern extends to outlying areas where urban dwellers visit and play The chapters aim to provide a better understanding of the natural resource elements in the urban environment and will be of interest to students of environmental studies and human geography
