Macro Economics The Basic Framework:

Macro-Economics Sharad K. Patel, 1984-09-01 An Introduction to Computational Macroeconomics Anelí Bongers, Trinidad Gómez, José L. Torres, 2020-09-01 This book presents an introduction to computational macroeconomics using a new approach to the study of dynamic macroeconomic models. It solves a variety of models in discrete time numerically using a Microsoft Excel spreadsheet as a computer tool. The solved models include dynamic macroeconomic models with rational expectations both non microfounded and microfounded constituting a novel approach that facilitates the learning and use of dynamic general equilibrium models which have now become the principal tool for macroeconomic analysis. Spreadsheets are widely known and relatively easy to use meaning that the computer skills needed to work with dynamic general equilibrium models are affordable for undergraduate students in Advanced Macroeconomics courses.

Macroeconomics, agriculture, and food security Díaz-Bonilla, Eugenio, 2015-10-27 Why write a book on macroeconomic policies and their links to agriculture and food security in developing countries? The food price spikes of the years just prior to 2010 and the economic, political and social dislocations they generated refocused the attention of policymakers and development practitioners on the agricultural sector and food security concerns. But even without those traumatic events, the importance of agriculture for developing countries and for an adequate functioning of the world economy cannot be denied. First, although declining over time, primary agriculture still represents important percentages of developing countries' overall domestic production, exports and employment. If agroindustrial, transportation, commercial and other related activities are also counted, then the economic and social importance of agriculture-based sectors increases significantly. Furthermore, large numbers of the world's poor still live in rural areas and work in agriculture. Through the links via production, trade, employment and prices, agricultural production is also crucial for national food security. Second, it has been shown that agriculture in developing countries has important growth and employment multipliers for the rest of the economy and agriculture seems to have larger positive effects in reducing poverty than growth in other sectors. Third, agriculture is not only important for individual developing countries but it has global significance considering the large presence of developing countries in world agricultural production and the increasing participation in international trade of those products. These three points will be covered in greater detail in Chapter 1. Essays In The Fundamental Theory Of Monetary Economics And Macroeconomics John Smithin, 2013-06-27 This book provides a comprehensive overview in the form of eight long essays of the evolution of monetary theory over the three quarters of a century from the time of Keynes to the present day. The essays are originally based on lecture notes from a graduate course on Advanced Monetary Economics offered at York University, Toronto, written in the style of academic papers. The essays are mathematical in method but also take a historical perspective, tracing the evolution of monetary thought through the Keynesian model, the monetarist model, the new classical model, etc., up to and including the neo-Wicksellian models of the early 21st century. The book will be an

A Study in Monetary Macroeconomics Stefan Homburg,2017-07-04 The financial crisis of 2007 and the following recession present a major challenge to macroeconomic theory The same holds true for exceptionally low interest rates during the recent years and for the puzzle that super expansive monetary policies failed to produce high inflation Approaches that focus on steady states rational expectations and individuals planning over infinite horizons are not suitable for analysing such abnormal situations A Study in Monetary Macroeconomics refines and improves mainstream approaches to resolve these puzzles and to contribute to a better understanding of monetary and fiscal policies Using a rich institutional structure that includes features such as credit money external finance borrowing constraints net worth real estate and commercial banks this timely study reduces rationality requirements to cope with its complex setting It starts with a simple baseline model deriving results from mathematical reasoning and simulations whilst adhering to the method of dynamic general equilibrium DGE with optimizing agents and fully specified models Highly topical A Study in Monetary Macroeconomics uses a unified theoretical framework to demonstrate that a DGE approach makes it possible to develop clean models that work outside steady states and are appropriate for answering macroeconomic questions of actual interest
