Comprehensive Dissertation Index ,1989 *Ten Crises* Peter Montiel,2013-12-17 Financial crises are dramatic events When they emerge they tend to dominate the attention of the press and become the focus of policymakers In one form or another they have affected the lives of millions of people throughout the world As references to 16th century Dutch tulips 18th South Seas merchant ventures or 1920s Florida real estate make clear they have been around for a long time At their worst such as in the cases of the Great Depression or the current Great Recession their effects have been felt worldwide with the number of people affected counted into the billions They have at times changed the course of history This book analyses ten of the most important financial crises of the last thirty years The specific crises covered in the book are the 1982 Chilean crisis the 1992 ERM crisis the 1994 Mexican crisis the 1997 Asian crisis the 1998 Russian crisis the 1999 Brazilian crisis the 1999 Ecuadorian crisis the 2000 Turkish crisis the 2002 Argentine crisis and the 2008 crisis in Iceland The set includes the most important emerging market crises of the last three decades as well as two particularly informative advanced country crises the ERM crisis of 1992 and the Icelandic crisis of 2008 A separate chapter is devoted to each crisis and a brief concluding chapter sums up some of the key lessons that I believe that we can draw from these events *Resources in Education* ,1990-04 The Origins of the Common Core D. Owens,2015-01-22 Owens provides a historical analysis of the ideological movements and reform efforts leading to the Common Core State Standards beginning with conservative criticism of public schools in the 1930s and culminating in a convergence of the political right and left in efforts to systemically reform education based on free market principles **Subject Catalog** Library of Congress,1978 **Handbook of Alternative Theories of Economic Development** Erik S. Reinert,Jayati Ghosh,Rainer Kattel,2016-09-28 The Handbook of Alternative Theories of Economic Development explores the theories and approaches which over a prolonged period of time have existed as viable alternatives to today s mainstream and neo classical tenets With a total of 40 specially commissioned chapters written by the foremost authorities in their respective fields this volume represents a landmark in the field of economic development It elucidates the richness of the alternative and sometimes misunderstood ideas which in different historical contexts have proved to be vital to the improvement of the human condition The subject matter is approached from several complementary perspectives From a historical angle the Handbook charts the mercantilist and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment From a geographical angle it includes chapters on African Chinese Indian and Muslim approaches to economic development Different schools are also explored and discussed including nineteenth century US development theory Marxist Schumpeterian Latin American structuralism regulation theory and world systems theories of development In addition the Handbook has chapters on important events and institutions including The League of Nations The Havana Charter and UNCTAD as well as on particularly influential development economists Contemporary topics such as the role of finance feminism the agrarian issue and ecology and the

environment are also covered in depth This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development It should be read by all serious scholars teachers and students of development studies and indeed anyone interested in alternatives to development orthodoxy *Economics and Evolution* Geoffrey Martin Hodgson,1996 How evolutionary ideas can be used to reconstruct economics *Alternative Coca Reduction Strategies in the Andean Region* ,1994 Identifies opportunities and constraints to coca reduction primarily in Bolivia Peru and Colombia Explores potential policy directions by the Federal government to improve the effectiveness of ongoing activities Contents factors influencing Coca reduction initiatives history of selected narcotics supply reduction efforts renewable resource based alternatives to Coca reduction agricultural forest wildlife and wildland and aquatic technologies to support alternative crop production Coca biological control issues Charts tables and photos *Karl Popper and Situational Analysis* Alfonso Palacio-Vera,2024-08-02 Situational Analysis represents Karl Popper s methodological proposal for the social sciences Although it has been widely studied and interpreted this book argues that Situational Analysis remains underestimated and undeveloped and if properly reformulated could yet become a broad methodological framework that encompasses both the historical social sciences and a large section of the theoretical social sciences The first part of this book develops this idea by returning to Popper s texts This book calls for both a reformulation of Situational Analysis and a clarification of the status and role of Popper s Rationality Principle This book also develops Situational Analysis by addressing two aspects of the Problem Situation facing individual actors that are only sketched out in Popper s work institutions and expectations The second part of this book utilizes the reformulated version of Situational Analysis to shed light on the core methodological differences across some of the most widespread approaches in contemporary economics and sociology In particular by showing that many of these approaches are variants of the reformulated version of Situational Analysis presented in the first part of this book this book argues that apparent methodological differences across these approaches may be reinterpreted as differences in the way social scientists reconstruct the Problem Situation facing individual actors This book will be vital reading for academic economists sociologists philosophers of science and other social scientists interested in methodology **Southern Journal of Agricultural Economics** ,1992 *Resources in Education* ,1990

Regional Research Frontiers - Vol. 1 Randall Jackson,Peter Schaeffer,2017-04-17 This volume focuses on frontiers in regional research and identifies trends and future developments in the areas of innovation regional growth and migration It also addresses topics such as mobility regional forecasting and regional policy and includes expert contributions on disasters resilience and sustainability Building on recent methodological and modelling advances as well as on extensive policy analysis experience top international regional scientists identify and evaluate emerging new conceptual and methodological trends and directions in regional research This book will appeal to a wide readership from regional scientists and economists to geographers quantitatively oriented regional planners and other related disciplines It offers a source of relevant

information for academic researchers and policy analysts in government and is also suitable for advanced teaching courses on regional and spatial science economics and political science American Doctoral Dissertations ,1977 **Choice** ,1988
