Manual of Clinical Oncology International Union against Cancer,1982 **UICC Manual of Clinical Oncology** James D. Brierley,Anil D'Cruz,Martin Fey,Raphael E. Pollock,Jan Vermorken,Shao Hui Huang,2015-07-28 The Manual of Clinical Oncology Ninth Edition published with the International Union Against Cancer UICC provides a concise accessible and feasible reference covering state of art multidisciplinary clinical oncology in order to meet the needs of clinicians caring for cancer patients throughout the world Edited by world renowned practising oncologists and written by key opinion leaders this book contains authoritative and up to date information on cancer detection diagnosis and treatment alongside topics such as survivorship special populations and palliative care Remodelled and revised for the ninth edition to provide practical information to oncology workers the UICC Manual of Clinical Oncology is structured in two parts Part 1 covers general principles of cancer diagnosis and management with additional attention to special settings in oncology including supportive care and survivorship and Part 2 covers site specific multidisciplinary cancer management The edition includes up to date summaries of all treatment modalities medical surgical and radiation for all tumour sites It also contains the latest TNM classifications outlined in the TNM Classification of Malignant Tumours The ninth edition includes Practical presentation with bullet points tables and flow charts intended to facilitate quick reference for day to day clinical practice in busy oncology environments Representation of multidisciplinary care for site specific management Evidence based approaches to management including specific treatment recommendations and investigations guided by clinical practice guidelines State of art evidence based recommendations that take into consideration the lack of availability of certain medications or resources as well as practice variations in different and remote regions of the world and Contemporary topics on cancer treatment such as cancer informatics evidence levels principles of prognostication survivorship and cancer in pregnancy Oncologists oncologists in training nurses working with cancer patients and other health professionals responsible for treating and caring for those with cancers will find the UICC Manual of Clinical Oncology an indispensable and comprehensive resource

Clinical Oncology International Union Against Cancer,2012-12-06 The outstanding success of the First Edition and the expansion of our knowledge about cancer over the 5 years since its publication have led to the decision to publish a Second Edition which has been fully revised rewritten and enlarged by the addition of several sections The First Edition was translated into Italian Japanese Polish and Serbo Croat and it is expected that additional translations French German Spanish Portuguese etc will make this Second Edition a truly international basic cancer Manual The Revision Committee is convinced that all students and general physicians should know a the important basic aspects of cancer b some details of the most common cancers and c a few important points about the less common cancers An attempt has been made to strengthen Part I General Aspects which is considered to be the most important part of the Manual for the world s physicians However the most common cancers in one part of the world are not necessarily the same in other parts and it is planned to work with local

groups to produce adaptations and translations as seem appropriate In particular the UICC is anxious to work with local national and international committees to help improve the educational experience of students and general physicians in the geographic areas in question Regional Conferences held by the UICC in Latin America Asia and the Middle East have resulted in initial plans to accomplish this aim

Manual of Clinical Oncology Charles D. Sherman, Kenneth C. Calman, Sandor Eckhardt, Ismail Elsebai, Dincer Firat, Dieter K. Hossfeld, Jean-Pierre Paunier, Bruno Salvadori, 2012-12-06 The continuing success of the VICC s Manual of Clinical Oncology and the continuing refinement of our educational objectives in cancer designed for graduating medical students and young practitioners coupled with significant additional knowledge in the cancer field have all led to the decision to publish a Fourth Edition The collaboration of the World Health Organization WHO and the Pan American Health Organization PAHO in our international and regional conferences in cancer education and the development of courses using the Manual as a basic resource have aided further definition of the VICC s role in cancer education throughout the world Our Revision Committee believes that we have incorporated in this small volume most of the knowledge about cancer which is essential for all students and practitioners to know and that we have done so in a clear and concise manner A large proportion of the material presented herein is devoted to basic aspects yet presented so that the clinical implications are clear Although we do not feel that general physicians need to know minor details about all cancers we feel it is particularly important to be somewhat thorough in our discussions of the more common cancers We have omitted discussion of the rare cancers and limited ourselves to the major concepts and principles of the less common cancers

It is a very special honour for me to be able to present this handbook of medical oncology which under diverse headings and origins covers such a vast spectrum of experience I believe the reader will be struck in particular by the impressive volume of information available especially with regard to childhood tumours which represent today an immense laboratory of hope It is in this very field that we oncologists have been able to obtain the most consoling results in recent years I feel sure that all those who read these chapters will find that their oncological competence is enriched and also in a certain sense that their wish to contribute to progress in cancer research and treatment has been renewed In conclusion my most heartfelt congratulations go to the authors for the excellent job they have done as well as my admiration for having been able to concentrate so much precious and innovative information into so little space Umberto Veronesi Preface Since 1976 the VICC has been holding chemotherapy courses in all parts of the world excluding North America and Australia The Manual of Cancer Chemotherapy originally devised as a didactic tool to be used by course participants expanded itself in the successive editions to a comprehensive although schematic textbook of medical oncology *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), *Current Catalog* National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70
