Many Faces Of Gender Roles And Relationships Through Time In Indigenous Northern Communities:

Many Faces of Gender Alaska Anthropological Association. Meeting, 2002 This is an interdisciplinary volume that addresses the dearth in descriptions and analyses of gender roles and relationships in Native societies in North America's boreal reaches This collection complements existing conceptual frameworks and develops new methodological and theoretical approaches that more fully articulate the complex nature of social economic political and material relationships between indigenous men and women in this region The contributors challenge the widespread notion that Native women's and men's roles are frozen in time a concept precluding the possibility of differently constructed gender categories and changing power relations and roles through time By examining the prehistorical historical and modern records they demonstrate that these roles are not fixed and have indeed gradually transformed Ideal for anthropologists and archaeologists interested in cross disciplinary studies of gender households women and lithics

Many Faces of Gender Alaska) Alaska Anthropological Association Meeting 1998 (Anchorage, 2002 *Many Faces of Gender* is an interdisciplinary volume that addresses the dearth in descriptions and analyses of gender roles and relationships in Native societies in North America's boreal reaches This collection complements existing conceptual frameworks and develops new methodological and theoretical approaches that more fully articulate the complex nature of social economic political and material relationships between indigenous men and women in this region The contributors challenge the widespread notion that Native women's and men's roles are frozen in time a concept precluding the possibility of differently constructed gender categories and changing power relations and roles through time By examining the pre historical historical and modern records they demonstrate that these roles are not fixed and have indeed gradually transformed *Many Faces of Gender* is ideal for anthropologists and archaeologists interested in cross disciplinary studies of gender households women and lithics

The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers Vicki Cummings, Peter Jordan, Marek Zvelebil, 2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate *The Oxford Handbook of the Archaeology and Anthropology of Hunter Gatherers* provides a comprehensive review of hunter gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter gatherer research but also themes that have great relevance for modern global society and its future challenges *The Handbook* also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter

gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity *The Oxford Handbook of the Prehistoric Arctic* T. Max Friesen, Owen K. Mason, 2016-08-05 The North American Arctic was one of the last regions on Earth to be settled by humans due to its extreme climate limited range of resources and remoteness from populated areas Despite these factors it holds a complex and lengthy history relating to Inuit Iupiat Inuvialuit Yupik and Aleut peoples and their ancestors The artifacts dwellings and food remains of these ancient peoples are remarkably well preserved due to cold temperatures and permafrost allowing archaeologists to reconstruct their lifeways with great accuracy Furthermore the combination of modern Elders traditional knowledge with the region s high resolution ethnographic record allows past peoples lives to be reconstructed to a level simply not possible elsewhere Combined these factors yield an archaeological record of global significance the Arctic provides ideal case studies relating to issues as diverse as the impacts of climate change on human societies the complex process of interaction between indigenous peoples and Europeans and the dynamic relationships between environment economy social organization and ideology in hunter gatherer societies In the *The Oxford Handbook of the Prehistoric Arctic* each arctic cultural tradition is described in detail with up to date coverage of recent interpretations of all aspects of their lifeways Additional chapters cover broad themes applicable to the full range of arctic cultures such as trade stone tool technology ancient DNA research and the relationship between archaeology and modern arctic communities The resulting volume written by the region s leading researchers contains by far the most comprehensive coverage of arctic archaeology ever assembled **Youth Culture, Language Endangerment and Linguistic Survivance** Leisy Thornton Wyman, 2012 *Youth Culture and Linguistic Survivance* documents a decade of life and language use in a remote Alaskan Yupik community It illuminates how schooling and migration shape complex linguistic ecologies how youth broker sociolinguistic transformation and how Indigenous peoples wide ranging forms of linguistic survivance sustain unique lifeways in an interconnected world *Handbook of Gender in Archaeology* Sarah M. Nelson, 2006 First reference work to explore the research on gender in archaeology *How the West Was Drawn* David Bernstein, 2018-08 *How the West Was Drawn* explores the geographic and historical experiences of the Pawnees the Iowas and the Lakotas during the European and American contest for imperial control of the Great Plains during the eighteenth and nineteenth centuries David Bernstein argues that the American West was a collaborative construction between Native peoples and Euro American empires that developed cartographic processes and culturally specific maps which in turn reflected encounter and conflict between settler states and indigenous peoples Bernstein explores the cartographic creation of the Trans Mississippi West through an interdisciplinary methodology in geography and history He shows how the Pawnees and the Iowas wedged between powerful Osages Sioux the horse and captive rich Comanche Empire French fur traders Spanish merchants and American Indian agents and explorers devised strategies of survivance and diplomacy to retain autonomy during this era The Pawnees and the Iowas developed a strategy of cartographic resistance to predations by both

Euro American imperial powers and strong indigenous empires navigating the volatile and rapidly changing world of the Great Plains by brokering their spatial and territorial knowledge either to stronger indigenous nations or to much weaker and conquerable American and European powers *How the West Was Drawn* is a revisionist and interdisciplinary understanding of the global imperial contest for North America's Great Plains that illuminates in fine detail the strategies of survival of the Pawnees the Iowas and the Lakotas amid accommodation to predatory Euro American and Native empires

The Archaeology of Large-Scale Manipulation of Prey Kristen A. Carlson, Leland C. Bement, 2018-05-30 The Archaeology of Large Scale Manipulation of Prey explores the social and functional aspects of large scale hunting adaptations in the archaeological record Mass kill hunting strategies are ubiquitous in human prehistory and exhibit culturally specific economic social environmental and demographic markers Here seven case studies primarily from the Americas and spanning from the Folsom period on the Great Plains to the ethnographic present in Australia expand the understanding of large scale hunting methods beyond the customary role of subsistence and survival to include the social and political realms within which large scale hunting adaptations evolved Addressing a diverse assortment of archaeological issues relating to the archaeological signatures and interpretation of mass kill sites The Archaeology of Large Scale Manipulation of Prey reevaluates and rephrases the deep time development of hunting and the themes of subsistence to provide a foundation for the future study of hunting adaptations around the globe Authors illustrate various perspectives and avenues of investigation making this an important contribution to the field of zooarchaeology and the study of hunter gatherer societies throughout history The book will appeal to archaeologists ethnologists and ecologists alike Contributors Jane Balme Jonathan Driver Adam C Graves David Maxwell Ulla Odgaard John D Speth Mar a Nieves Zede o **Across a Great Divide** Laura L. Scheiber, Mark D. Mitchell, 2010-02-15 Archaeological research is uniquely positioned to show how native history and native culture affected the course of colonial interaction but to do so it must transcend colonialist ideas about Native American technological and social change This book applies that insight to five hundred years of native history Using data from a wide variety of geographical temporal and cultural settings the contributors examine economic social and political stability and transformation in indigenous societies before and after the advent of Europeans and document the diversity of native colonial experiences The book's case studies range widely from sixteenth century Florida to the Great Plains to nineteenth century coastal Alaska The contributors address a series of interlocking themes Several consider the role of indigenous agency in the processes of colonial interaction paying particular attention to gender and status Others examine the ways long standing native political economies affected and were in turn affected by colonial interaction A third group explores colonial period ethnogenesis emphasizing the emergence of new native social identities and relations after 1500 The book also highlights tensions between the detailed study of local cases and the search for global processes a recurrent theme in postcolonial research If archaeologists are to bridge the artificial divide separating history from prehistory they must

overturn a whole range of colonial ideas about American Indians and their history This book shows that empirical archaeological research can help replace long standing models of indigenous culture change rooted in colonialist narratives with more nuanced multilinear models of change and play a major role in decolonizing knowledge about native peoples

Settlement, Subsistence, and Change Among the Labrador Inuit Larry Felt, Andrea H. Procter, David C. Natcher, 2012
Comprised of twelve essays the book examines the way of life and cultural survival of Inuit from communities throughout northern and central Labrador including social economy of wildfood production forced relocations and land claims subsistence and settlement patterns and issues around climate change urban planning and self government
