Map, 1300-1492 Evelyn Edson, 2007-07-15 A history of the development of world maps during the later medieval period in
the centuries leading up to Columbus s journey In the two centuries before Columbus mapmaking was transformed The
World Map 1300 1492 investigates this important transitional period of mapmaking Beginning with a 1436 atlas of ten maps
produced by Venetian Andrea Bianco Evelyn Edson uses maps of the fourteenth and fifteenth centuries to examine how the
discoveries of missionaries and merchants affected the content and configuration of world maps She finds that both the
makers and users of maps struggled with changes brought about by technological innovation the compass quadrant and
astrolabe rediscovery of classical mapmaking approaches and increased travel To reconcile the tensions between the
conservative and progressive worldviews mapmakers used a careful blend of the old and the new to depict a world that was
changing and growing before their eyes This engaging and informative study reveals how the ingenuity creativity and
adaptability of these craftsmen helped pave the way for an age of discovery A comprehensive and complex picture of the
changing face of medieval geography With the mastery of a formidable palette of historiographic knowledge and well
reasoned discussions of the sources The World Map 1300 1492 will certainly remain an important work to consult for both
medieval and early modern scholars for many years to come Ian J Aebel Terrae Incognitae **The Art of Illustrated Maps**
