Encyclopedia of Early Childhood Education Doris Pronin Fromberg,Leslie R. Williams,2012-05-23 This Encyclopedia is a reference work about young children in the USA designed for use by policy makers community planners parents of young children teacher and early childhood educators programme and school administrators among others The field of early childhood education has been affected by changes taking place in the nation s economy demographics schools communities and families that influence political and professional decisions These diverse historical political economic socio cultural intellectual and educational influences on early childhood education have hindered the development of a clear definition of the field The Encyclopedia provides an opportunity to define the field against the background of these influences and relates the field of early childhood education to its diverse contexts and to the cultural and technological resources currently affecting it *Encyclopedia of Early Childhood Education* Leslie R. Williams,Doris Pronin Fromberg,2012 This Encyclopedia is a reference work about young children in the USA designed for use by policy makers community planners parents of young children teacher and early childhood educators programme and school administrators among others The field of early childhood education has been affected by changes taking place in the nation s economy demographics schools communities and families that influence political and professional decisions The Encyclopedia provides an opportunity to define the field against the background of these influences and relates the field of early childhood education to its diverse contexts and to the cultural and technological resources currently affecting it *Assessment of Authentic Performance in School Mathematics* Richard A. Lesh,Susan J. Lamon,2013-04-03 This book is the result of a conference sponsored by the Educational Testing Service and the University of Wisconsin s National Center for Research in Mathematical Sciences Education The purpose of the conference was to facilitate the work of a group of scholars whose interests included the assessment of higher order understandings and processes in foundation level pre high school mathematics Discussions focused on such issues as the purposes of assessment guidelines for producing and scoring real life assessment activities and the meanings of such terms as deeper and higher order understanding cognitive objectives and authentic mathematical activities Assessment was viewed as a critical component of complex dynamic and continually adapting educational systems During the time that the chapters in this book were being written sweeping changes in mathematics education were being initiated in response to powerful recent advances in technology cognitive psychology and mathematics as well as to numerous public demands for educational reform These changes have already resulted in significant reappraisals of what it means to understand mathematics of the nature of mathematics teaching and learning and of the real life situations in which mathematics is useful The challenge was

to pursue assessment related initiatives that are systematically valid in the sense that they work to complement and enhance other improvements in the educational system rather than act as an impediment to badly needed curriculum reforms To address these issues most chapters in this book focus on clarifying and articulating the goals of assessment and instruction and they stress the content of assessment above its mode of delivery Computer or portfolio based assessments are interpreted as means to ends not as ends in themselves Assessment is conceived as an ongoing documentation process seamless with instruction whose quality hinges upon its ability to provide complete and appropriate information as needed to inform priorities in instructional decision making This book tackles some of the most complicated issues related to assessment and it offers fresh perspectives from leaders in the field with the hope that the ultimate consumer in the instruction assessment enterprise the individual student will reclaim his or her potential for self directed mathematics learning

Visible Thinking in the K-8 Mathematics Classroom Ted H. Hull, Don S. Balka, Ruth Harbin

Miles, 2011-01-21 The key to students success in math lies in a way of teaching that provides clear evidence of how students are thinking about problems and builds on that thinking to take them to a deeper level of understanding Seasoned math educators Ted Hull Don Balka and Ruth Harbin Miles offer teachers a sequential and developmental plan for integrating visual thinking into current classroom practices and gradually but steadily initiating successful instructional changes in mathematics Their new book provides teachers with numerous sample problems and classroom scenarios showing successful teacher interventions at work and offers guidance on how teachers can adapt traditional problems to promote visible thinking in their own classrooms
