

**Mathematics for Business Economics** has been developed for students in mathematics or a higher professional and university economics studies. It not only presents the fundamentals of mathematics, but also shows how mathematics is applied especially in business economics.

It is based on many years of experience in mathematics for business economics and business administration at Tilburg University, and on teaching high school students. As a result, this book perfectly fits the level of first-year students in economics and business administration. This is achieved by paying more attention to elementary calculation techniques (e.g. solving of equations), introducing well-known – the change in the order of the mathematical terms and the notation of these exercises and formulas.
