Maths in the Mind Ann Baker, 1991 Maths in the Mind suggests starting points for encouraging children to become fluent and independent thinkers in math lessons It presents ideas for building on strategies that children acquire naturally before they come to school and outlines a rich variety of strategies that research has found children develop as they become more competent at mathematics The activities presented in this book encourage children to use and develop these strategies as part of their mathematical thinking across the full range of the primary school The activities have been extensively trialled in the classroom as the photographs which accompany the text demonstrate Maths in the Mind emphasizes the processes involved in mathematical thinking rather than the right answer Children are encouraged to explore to delve into what they do know and this reduces the sense of helplessness that can occur when they don't know what to do Maths in the
