Addressing issues of mentoring for all trainee and practising mathematics teachers. *Mentoring Mathematics Teachers* demonstrates both the importance of mentoring in the development of new teachers of mathematics but also the benefits to all those who involve themselves in this challenging and rewarding task.

Blended Learning and Online Tutoring Janet MacDonald, 2017-03-02. Blended learning provides the flexibility to accommodate the varied requirements of pedagogies, disciplines and levels of course together with the needs of a wide variety of learners. However, anyone concerned with the integration of online tutoring to support students appropriately may need to reassess current practice. This book adopts a pragmatic and common sense approach to blended learning by situating the use of online media within a well grounded teaching and learning strategy. It provides practical ideas for the successful implementation of blended strategies including good practice in both asynchronous and synchronous tutoring, appropriate assessment design for developing successful blended learners and innovative approaches to professional development for distance tutors. It is illustrated with a wide variety of examples and comments from students and practitioners in both distance and campus based environments in 13 different countries. Since the first edition was published in 2006, there has been great interest in Web 2.0 technologies and their potential for use in an educational environment. This second edition has therefore incorporated many new examples of good practice, making use of a combination of tried and tested tools as well as blogs and wikis for supporting students. There has also been a recent rise in the use of activity based learning and interest in its potential for supporting students in distance and online environments. The new edition incorporates many new exemplars of learning activity design in Part Three to illustrate approaches to the development of critical independent learners.

My World Ami Charlize, 2024-07-18. Hey guys, it's me, Ami Charlize. For years I've been sharing my life online, the good and bad bits, but what you've seen only scratches the surface of the rollercoaster that's got me to where I am today. And it's been anything but smooth, trust me. From the tricky friendships and relationships I've navigated to the huge life changing decisions I've made, in this book I'm ready to take you behind the scenes and reveal it all: the ups, the downs, and everything in between. Along the way, I'll also be sharing the life lessons I've learned that will help you chase your own dreams, whatever those might be. So whether you're wondering how to bounce back from a setback, wanting to find people who better understand you, or are ready to start out on your own, I hope you're ready to start shaping your

world I can't wait to get started together Love Ami x Low Attainers In Primary Mathematics Berinderjeet Kaur, Masura Ghani, 2011-10-25 *Low Attainers in Primary Mathematics* focuses on data from students in Singapore schools. It is widely acknowledged that students from Singapore do well in mathematics in international studies. This book provides readers with a glimpse of students from Singapore who are at the other end of the ability spectrum. The book is based on a study that explored the mathematics content knowledge of Primary 4 low attainers in mathematics, their behaviours, affects, and home backgrounds and learning experiences. Based on the findings of the study, the book has recommendations for teachers of low attainers in primary mathematics. This book serves as a must-have resource for teachers and graduate students in Singapore who are working with or studying low attainers in primary mathematics. It also makes a worthy contribution towards literature on low attainers in the field of mathematics education.

Multimodal Usability Niels Ole Bernsen, Laila Dybkjær, 2009-10-03 This preface tells the story of how Multimodal Usability responds to a special challenge. Chapter 1 describes the goals and structure of this book. The idea of describing how to make multimodal computer systems usable arose in the European Network of Excellence SIMILAR Taskforce for creating human-machine interfaces SIMILAR to human-human communication. 2003-2007 www.similar.cc SIMILAR brought together people from multimodal signal processing and usability with the aim of creating enabling technologies for new kinds of multimodal systems and demonstrating results in research prototypes. Most of our colleagues in the network were in fact busy extracting features and figuring out how to demonstrate progress in working interactive systems while claiming not to have too much of a notion of usability in system development and evaluation. It was proposed that the authors support the usability of the many multimodal prototypes underway by researching and presenting a methodology for building usable multimodal systems. We accepted the challenge first and foremost, no doubt, because the formidable team spirit in SIMILAR could make people accept outrageous things. Second, having worked for nearly two decades on making multimodal systems usable, we were curious, curious at the opportunity to try to understand what happens to traditional usability work that is work in human-computer interaction centred around traditional graphical user interfaces GUIs when systems become as multimodal and as advanced in other ways as those we build in research today.
