describe their childhood communities religious rituals and cultural traditions as well as the ongoing struggle of adjustment to their new homeland The work also delves into the Mong perceptions of industrialization and the generational conflict that immersion into a literate society has caused The author himself is a member of the Mong culture and brings a personal perspective to preserving the oral traditions of this unique ethnicity The work is also indexed

Innovations in Educational Ethnography George Spindler, Lorie Hammond, 2012-10-12 This volume focuses on and exemplifies how ethnography a research tool devoted to looking at human interaction as a cultural process rather than individual psychology can shed light on educational processes framed by the complex internationalized societies in which we live today Part I offers theoretical chapters about ethnography and examples of innovative ethnography from particular perspectives In Part II the emphasis is on the application of ethnographic approaches to educational settings Each contribution not only takes the reader on a thoughtful and enlightening journey but raises issues that are important to both educators and ethnographers including the relationship of researcher to subject the meaning of participant in participant observation and ways to give voice to disenfranchised players and on the complex ways in which all parties experience identities such as race in the modern world Innovations in Educational Ethnography Theory Methods and Results is a product of both continuity and change It presents current writings from mentors in the field of ethnography and education as well as the work of their students and of educators engaged in cultural studies of their work In many ways it provides fresh new vistas on the old questions that have always guided ethnographic research and can be used as a survey both of what ethnography has been and what it is becoming This book is the work of many hands and provides excellent examples of trends in both basic and applied ethnography of education These two kinds of work augment and

reinforce each other and also represent important current research directions in depth reflection on the process of ethnography itself and an application of its insights to teaching and learning in schools universities and communities No one philosophy guides the contributions to this volume nor were they chosen as exemplary of a particular approach yet foundational understandings and principles of ethnography shine through the work in both predictable and unexpected ways

Duffy, 2007-05-31 Outstanding Book Award Conference on College Composition and Communication We are only beginning to recognize the global forces that have long shaped literacy in the United States What we need now is a book that demonstrates how to theorize U S literacy with regard to globalization s complex legacy *Writing from These Roots* satisfies this need and then some Duffy s careful representation of Hmong literacy narratives is a remarkable accomplishment in its own right not least for the respect he shows the women and men whose stories enable him to delineate personal cultural and national pathways to literacy In also documenting Hmong people s transnational pathway to literacy in the United States Duffy expertly details the rhetorical means by which literacy can make legible the self fashioning of distinct identities against a historical backdrop bleached by generations of assimilationist public policy and racist discourse Duffy s insistence that we think rhetorically about literacy is a call that will resonate in literacy scholarship for years to come Peter Mortensen University of Illinois at Urbana Champaign *Writing from These Roots* is without doubt a major original and important work Fittingly for a book that conceptualizes its topics and themes globally and comparatively it will attract an international audience Harvey J Graff The Ohio State University This is a fascinating and important study that is rich in theoretical insight about literacy and has an informed and detailed account of the Hmong experience in Laos and the United States Franklin Ng California State University Fresno *Writing from These Roots* documents the historical development of literacy in a Midwestern American community of Laotian Hmong a people who came to the United States as refugees from the Vietnam War and whose language had no widely accepted written form until one created by missionary linguists was adopted in the late twentieth century by Hmong in Laos and later the U S and other Western nations As such the Hmong have often been described as preliterate nonliterate or members of an oral culture Although such terms are problematic it is nevertheless true that the majority of Hmong did not read or write in any language when they arrived in the U S For this reason the Hmong provide a unique opportunity to study the forces that influence the development of reading and writing abilities in cultures in which writing is not widespread and to do so within the context of the political economic religious military and migratory upheavals classified broadly as globalization *In Defense of Asian American Studies* Sucheng Chan, 2005 *In Defense of Asian American Studies* offers fascinating tales from the trenches on the origins and evolution of the field of Asian American studies as told by one of its founders and most highly regarded scholars Wielding intellectual energy critical acumen and a sly sense of humor Sucheng Chan discusses her experiences on three campuses

within the University of California system as Asian American studies was first developed in response to vehement student demand under the rubric of ethnic studies Chan speaks by turns as an advocate and an administrator striving to secure a place for Asian American studies as a teacher working to give Asian American students a voice and white students a perspective on race and racism and as a scholar and researcher still asking her own questions The essays span three decades and close with a piece on the new challenges facing Asian American studies Eloquently documenting a field of endeavor in which scholarship and identity define and strengthen each other In Defense of Asian American Studies combines analysis personal experience and indispensable practical advice for those engaged in building and sustaining Asian American studies programs
