Ideal Theoretic Methods in Commutative Algebra Daniel Anderson, Ira J. Patrick, 2019-05-07 Includes current work of 38 renowned contributors that details the diversity of thought in the fields of commutative algebra and multiplicative ideal theory Summarizes recent findings on classes of going down domains and the going down property emphasizing new characterizations and applications as well as generalizations for commutative rings with **Algebraic, Number Theoretic, and Topological Aspects of Ring Theory** Jean-Luc Chabert, Marco Fontana, Sophie Frisch, Sarah Glaz, Keith Johnson, 2023-07-07 This volume has been curated from two sources presentations from the Conference on Rings and Polynomials Technische Universität Graz Graz Austria July 19-24 2021 and papers intended for presentation at the Fourth International Meeting on Integer valued Polynomials and Related Topics CIRM Luminy France which was cancelled due to the pandemic The collection ranges widely over the algebraic number theoretic and topological aspects of rings algebras and polynomials Two areas of particular note are topological methods in ring theory and integer valued polynomials The book is dedicated to the memory of Paul Jean Cahen a coauthor or research collaborator with some of the conference participants and a friend to many of the others This collection contains a memorial article about Paul Jean Cahen written by his longtime research collaborator and coauthor Jean Luc Chabert **Advances in Commutative Algebra** Ayman Badawi, Jim Coykendall, 2019-04-11 This book highlights the contributions of the eminent mathematician and leading algebraist David F. Anderson in wide ranging areas of commutative algebra It provides a balance of topics for experts and non experts with a mix of survey papers to offer a synopsis of developments across a range of areas of commutative algebra and outlining Anderson's work The book is divided into two sections surveys and recent research developments with each section presenting material from all the major areas in commutative algebra The book is of interest to graduate students and experienced researchers alike Multiplicative Ideal Theory in Commutative Algebra James W. Brewer, Sarah Glaz, William Heinzer, Bruce Olberding, 2006-12-15 For over forty years Robert Gilmer's numerous articles and books have had a tremendous impact on research in commutative algebra It is not an exaggeration to say that most articles published today in non Noetherian ring theory and some in Noetherian ring theory as well originated in a topic that Gilmer either initiated or enriched by his work This volume a tribute to his work consists of twenty four articles authored by Robert Gilmer's most prominent students and followers These articles combine surveys of past work by Gilmer and others recent results which have never before seen print open problems and extensive bibliographies In a concluding article Robert Gilmer points out directions for future research highlighting the open problems in the areas he considers of importance Robert Gilmer's article is followed by the complete list of his published works his mathematical genealogical tree information on the writing of his four books and reminiscences about Robert Gilmer's contributions to the stimulating research environment in commutative algebra at
