Region Race And Reconstruction Essays In Honor Of C Vann Woodward:

Region, Race, and Reconstruction J. Morgan Kousser, James M. McPherson, 1982 In this tribute to one of the foremost American historians the topics range from an intriguing analysis of taxation's role in the downfall of Republican state governments during Reconstruction to an investigation of the relationship between fencing laws and Populism from a study of the troubled experiment of educating blacks and American Indians together at Hampton Institute to an account of Booker T. Washington's relationship with Jews

A Companion to the American South John B. Boles, 2008-04-15 A Companion to the American South surveys and evaluates the most important and innovative writing on the entire sweep of the history of the southern United States. Contains 29 original essays by leading experts in American Southern history. Covers the entire sweep of Southern history including slavery, politics, the Civil War, race relations, religion, and women's history. Surveys and evaluates the best scholarship on every important era and topic. Summarizes current debates and anticipates future concerns.

Patriots and Cosmopolitans John Fabian Witt, 2009-06-30 Ranging from the founding era to Reconstruction from the making of the modern state to its post New Deal limits John Fabian Witt illuminates the legal and constitutional foundations of American nationhood through the stories of five patriots and critics. In their own way each of these individuals came up against the power of American national institutions to shape the directions of legal change

The Body Politic Catherine A. Holland, 2013-07-04 This work advances an original thesis that challenges the dominant schools of thought concerning the liberal tradition in the US

Themes in Religion and American Culture Philip Goff, Paul Harvey, 2005-10-12 Designed to serve as an introduction to American religion this volume is distinctive in its approach. Instead of following a traditional narrative the book is arranged thematically. Eleven chapters by top scholars present in carefully organized and accessible fashion topics and perspectives fundamental to the understanding of religion in America. Some of the chapters treat aspects of faith typical to most religious groups such as theology, proselytization, supernaturalism, and cosmology. Others deal with race, ethnicity, gender, the state, economy, science, diversity, and regionalism, facets of American culture that often interact with religion. Each topical essay is structured chronologically, divided into sections on pre-colonial, colonial, revolutionary, and early republican, antebellum, postbellum, and late nineteenth century, early twentieth century, and modern America. One can study the extended history of a certain theme or read across the book for a study of all the themes during a specific period in history. This book's new approach offers a rich analysis of the genuine complexity of American religious life. With a helpful glossary of basic religious terms, movements, people, and groups, this book will become an essential tool for students and teachers of religion.
