working in the areas of regional studies economics and policy studies *Protected Areas and Regional Development in Europe* Ingo Mose, 2016-04-15 While originally created as reserves for beautiful landscapes and endangered species protected areas in Europe were subsequently used as a means to preserve whole ecosystems with restrictions on human activities and impacts More recently protected areas are also being considered as instruments for regional development particularly in marginal regions facing severe economic and socio cultural problems Contrary to previous conservation focused policies new approaches aim to blend conservation and development functions making protected areas real living landscapes and integrating activities such as agriculture forestry handicrafts tourism and education with the conservation and sustainability aspects The past decade has seen a marked increase in these innovative and dynamic types of protected areas However the policies of individual European countries are very varied This volume provides a comprehensive overview of the relationship between protected areas and regional development policies both in theory and practice Illustrated with a wide range of case studies from across Europe it compares the different concepts strategies and instruments being used In conclusion it suggests the most innovative and successful ways to use protected areas for regeneration and sustainable regional development *Mobilizing Regions, Mobilizing Europe* Sebastian M. Buettner, 2013-10-23 Regional development strategies are becoming more similar all around Europe even though regional differences are more pronounced than ever and many European regions have become more autonomous actors This thesis of a peculiar standardized diversification of sub national space in the modern European Union is the point of departure of this book Based upon the analytical premises of Stanford School Sociological Institutionalism Sebastian M B ttner studies regional mobilization in contemporary Europe from a new and innovative perspective He highlights the importance of scientific expertise and global scientific models in contemporary regional development practice and exemplifies their significance with the example of region building in Poland in the course of EU integration This new wave of regional mobilization is not just conceived as an effect of local national or European politics but as an expression of a larger conceptual shift in governing society and space This well researched and clearly argued book not only provides fresh insights into region building and regionalization in contemporary European space but also contributes to the new sociology of Europeanization It will be an illuminating read for scholars and students in Sociology European and EU studies International Relations Cultural Studies Geography Regional Science Polish Studies and related subject areas **Regional Integration in the Asia Pacific Issues and Prospects** OECD, The Bob Hawke Prime Ministerial Centre at the University of South Australia, 2005-04-28 This report published by the OECD s International Futures Programme in co operation with the Bob Hawke Prime Ministerial Centre in Australia aims to stimulate informed debate about the main integration issues facing the Asia Pacific region in the **The Routledge Handbook to Regional Development in Central and Eastern Europe** Gábor Lux, Gyula Horváth, 2017-07-06 Twenty five years into transformation Central and Eastern European regions have undergone substantial socio economic restructuring integrating into European

and global networks and producing new patterns of regional differentiation and development Yet post socialist modernisation has not been without its contradictions manifesting in increasing social and territorial inequalities Recent studies also suggest there are apparent limits to post socialist growth models accompanying a new set of challenges within an increasingly uncertain world Aiming to deliver a new synthesis of regional development issues at the crossroads between post socialism and post transition this book identifies the main driving forces of spatial restructuring in Central and Eastern Europe and charts the different regional development paths which take shape against the backdrop of post crisis Europe A comparative approach is used to highlight common development challenges and the underlying patterns of socio economic differentiation alike The issues investigated within the Handbook extend to a discussion of the varied economic consequences of transition the social structures and institutional systems which underpin development processes and the broadly understood sustainability of Central and Eastern Europe s current development model This book will be of interest to academics and policymakers working in the fields of regional studies economic geography development studies and policy

Young People and Active Citizenship in Post-Soviet Times Beata Krzywosz-Rynkiewicz, Anna Zalewska, Kerry J.

Kennedy, 2017-08-10 Situated within the context of post soviet times this book explores young people s citizenship activities and values in three distinct environments post soviet union countries post soviet union satellites and countries that were independent of the soviet union Its purpose is to investigate the influence of these contexts on the ways young people see their citizenship in what are now emerging democracies The future of nations depends to a large extent on whether citizens will continue to support existing values and will engage in activities to support those values Using a framework designed by Kennedy 2006 and further developed by Zalewska Krzywosz Rynkiewicz 2011 the study examined the citizenship values of 3794 students aged 11 14 18 from 11 European countries The main themes of this book include exploring similarities and differences in citizenship activities within countries and across countries advancing explanations for these similarities and differences highlighting the importance of contexts that influence citizenship activities and values and assessing the extent to which democratic values are reflected in young people s citizenship activities The UK Regional-National Economic Problem

Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and

Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
