Northern Atlantic Islands and the Sea Andrew Jennings, Silke Reeploeg, Angela Watt, 2017-05-11 Iceland the Faroe Islands Orkney Shetland and to some extent the Hebrides share both a Nordic cultural and linguistic heritage and the experience of being surrounded by the ever present North Atlantic Ocean This has been a constant in the islanders history forging their unique way of life influencing their customs and traditions and has been instrumental in moulding their identities This volume is an exploration of a rich intimate and at times terrifying relationship It is the result of an international conference held in April 2014 when scholars from across the North Atlantic rim congregated in Lerwick Shetland to discuss maritime traditions islands in Old Norse literature insular archaeology folklore and traditional belief The chapters reflect the varied origins of the contributors Icelanders are well represented as are scholars based in Orkney and Shetland indicating the strength of scholarship in these seemingly isolated archipelagos Peripheral they may be to the UK but they lie at the heart of the North Atlantic at the intersection of British and Nordic cultures This book will be of interest to scholars of a wide range of disciplines such as those involved in island studies cultural studies Old Norse literature Icelandic studies maritime heritage oceanography linguistics folklore British studies ethnology and archaeology Similarly it will also

appeal to researchers from a wide geographical area particularly the UK and Scandinavia and indeed anywhere where there is an interest in the study of islands or the North Atlantic The Urban Logistic Network Giovanni Favero, Michael-W.

Serruys, Miki Sugiura, 2019-11-20 This edited collection examines the formation of urban networks and role of gateways in Europe from the Middle Ages to the modern world In the past gateway cities were merely perceived as transport points only relevant to maritime shipping Today they are seen as the organic entities coordinating the allocation of resources and supporting the growth efficiency and sustainability of logistics including both the transport and distribution of goods and services Using different historical case studies the authors consider how logistics shaped urban networks and were shaped by them *Denmark, 1513-1660* Paul Douglas Lockhart, 2007-08-23 One of the largest states in Europe and the greatest of

the Protestant powers Denmark in the sixteenth and seventeenth centuries was at the height of its influence Embracing Norway Iceland portions of southern Sweden and northern Germany the Danish monarchy dominated the vital Baltic trade However its geopolitical importance far exceeded its modest resources Paul Douglas Lockhart examines the short and perhaps unlikely career of Denmark as the major power of northern Europe exploring its rise to the forefront of European affairs and its subsequent decline in fortunes following its disastrous involvement in the Thirty Years War Using the latest research from Danish and other Scandinavian scholars Lockhart focuses on key issues from the dynamic role of the Oldenburg monarchy in bringing about Denmark's European integration to the impact of the Protestant Reformation on Danish culture The multi national character of the Danish monarchy is explored in depth in particular how the Oldenburg kings of Denmark sought to establish their authority over their sizable and oftentimes contentious Norwegian Icelandic and German minorities Denmark's participation in international politics and commerce is also investigated along with the power struggle between Denmark and its rival Sweden over Baltic dominion and the Danes unique approach to internal governance

The Integration of the European Economy, 1850-1913 Lee A. perspectives concerning regions traditionally considered on the margins of Europe this book fills a gap in current historiography through its analysis of cities space and economy from the High Middle Ages to the present Markets trade and economy in general have formed the backbone of urban life ever since the emergence of cities and towns but classical theorists have largely focused on developments in Western Europe Urban research in the last few decades has advanced in many ways to supersede and correct this still influential image and to include other parts of Europe into the analytical

framework Building on these emerging methodologies this volume pays close attention to the fringes of Europe in the East North West and South The essays discuss the development of various spaces as nodal points for the exchange and production of commodities that took place in cities and towns The scope of this work allows for a point of comparison to frequently studied examples in Europe encouraging readers to identify larger patterns beyond individual examples Cities and Economy in Europe Markets and Trade on the Margins from the Middle Ages to the Present is the perfect resource for students and researchers of economic and urban history

Military Revolution and the Thirty Years War 1618-1648 Olli Bäckström, 2023-11-08 Military Revolution and the Thirty Years War 1618 1648 investigates change and decline in military institutions during a period of protracted and destructive European warfare Conceptual background is provided by the Military Revolution thesis which argues that changes in military technology and tactics drove revolutionary transformation in the way states organised and waged war in the early modern era This transformation of military institutions became evident during the long and destructive Thirty Years War in 1618 1648 The outcome of the Military Revolution was the centralised fiscal military state that possessed a strong claim to the monopoly of violence within its territorial boundaries The book examines how the Thirty Years War accelerated and even initiated transformation in four military institutions that defined land warfare feudal cavalry services militias regular armies and war commissariats The regional scope of the investigation covers the Holy Roman Empire France Spain Portugal Sweden Denmark and the Dutch Republic The book combines military historical inquiry with

ancillary sciences of sociology and economics It argues that the Military Revolution of the Thirty Years War stimulated institutions capable of increased complexification and specialisation while curtailing those that were locked in stasis and immutability The institutional legacy of the Thirty Years War was the emergence of complex military organisations that are characteristic to the modern society and its self renewing social subsystems Previous scholarship on the Military Revolution has concentrated on military technicalities and the wider process of early modern state formation This book proposes an alternative way of viewing early modern military transformations from the perspectives of institutions and systems System analytical survey of change and decline in the military institutions of the Thirty Years War introduces qualifications to the Military Revolution theory and offers a novel way of conceptualising early modern military history **Essays on**

Kaljundi,2025-10-01 Our historical understanding of the Reformation in northern Europe has tended to privilege the idea of disruption and innovation over continuity yet even the most powerful reformation movements drew on and exchanged ideas with earlier cultural and religious practices This volume attempts to right the balance bringing together a roster of experts to trace the continuities between the medieval and early modern period in the Nordic realm while enabling us to see the Reformation and its changes in a new light
