Density Ratio Estimation in Machine Learning Masashi Sugiyama,Taiji Suzuki,Takafumi Kanamori,2012-02-20 This book introduces theories methods and applications of density ratio estimation a newly emerging paradigm in the machine learning community Statistics in Genetics and in the Environmental Sciences Luisa T. Fernholz,Stephan Morgenthaler,Werner Stahel,2012-12-06 Statistics is strongly tied to applications in different scientific disciplines and the most challenging statistical problems arise from problems in the sciences In fact the most innovative statistical research flows from the needs of applications in diverse settings This volume is a testimony to the crucial role that statistics plays in scientific disciplines such as genetics and environmental sciences among others The articles in this volume range from human and agricultural genetic DNA research to carcinogens and chemical concentrations in the environment and to space debris and atmospheric chemistry Also included are some articles on statistical methods which are sufficiently general and flexible to be applied to many practical situations The papers were refereed by a panel of experts and the editors of the volume The contributions are based on the talks presented at the Workshop on Statistics and the Sciences held at the Centro Stefano Franscini in Ascona Switzerland during the week of May 23 to 28 1999 The meeting was jointly organized by the Swiss Federal Institutes of Technology in Lausanne and Zurich with the financial support of the Minerva Research Foundation As the presentations at the workshop helped the participants recognize the potential role that statistics can play in the sciences we hope that this volume will help the reader

to focus on the central role of statistics in the specific areas presented here and to extrapolate the results to further applications
