Rift Between America And Old Europe The Distracted Eagle:

The Rift Between America and Old Europe Peter H. Merkl, 2005 This new book explains the recent rift between America and some of her oldest European allies especially with Germany and France Particular attention is devoted to the several competing interpretations of the Euro American rift for example that Europeans were taken aback when American neo conservative leaders scornfully rejected their well meant offers of post 9 11 assistance with expressions of disdain for the allies backward military technology and budgets The Bush administration s rejection of the Kyoto Treaty its environmental stance and its position on international treaties are also examined in detail Merkl s interpretation emphasizes America s neo imperial unilateralist posture and policies as contrasted to the Wilsonian internationalism that created the United Nations and established international rule of law backed up by the Security Council a web of international treaties and international courts including the International Court of Criminal Justice Today s American leaders thus oppose European champions of an American initiated international order while identifying themselves with the imperialist European doctrines and practices of another age

Justifying America's Wars Nicholas Kerton-Johnson, 2010-09-13 This book examines the justifications for and practice of war by the US since 1990 and examines four case studies the Gulf War Kosovo Afghanistan and Iraq The author undertakes an examination of presidential speeches and public documents from this period to determine the focal points on which the respective presidents based their rhetoric for war The work then examines the practice of war in the light of these justifications to determine whether changes in justifications correlate with changes in practice In particular the justificatory discourse finds four key themes that emerge in the presidential discourses which are tracked across the case studies and point to the fundamental driving force in US motivations for going to war The four key themes which emerge from the data are international law or norms human rights national interest and egoist morality similar too but wider than exceptionalism This analysis shows that 9 11 resulted in a radical shift away from an international law and human rights focused justificatory discourse to one which was overwhelmingly dominated by egoist morality justifications and national interest This book will be of much interest to students of US foreign policy humanitarian intervention Security Studies and IR theory

Missile Defence Sten Rynning, Bertel Heurlin, 2005-11-17 The missile defence policy of the US plays a crucial role in international affairs and is normally studied from a US perspective This book is different it delivers a sharp analysis of regional and national variations and integrates them with US viewpoints to present a rounded and comprehensive study What will be the international ramifications of American plans to deploy a comprehensive national missile defence policy This is a key question for all those wishing to build a sense of the global future and is here answered with clarity and rigour by expert contributors This new study breaks the mould of traditional assessments that focus exclusively on the US world picture and are inevitably one dimensional Here we

see that US action automatically entails reactions as this text advances a more balanced approach By integrating a focus on US policy with a strong analysis of regional dynamics it demonstrates that the global ramifications of US policy are indeed contingent upon distinct regional and national variations These differences in turn have consequences both for the challenges the US faces in relation to missile defence and for the future of world politics This is an innovative and groundbreaking study that contains lessons for those wishing to safeguard the future by becoming alert to its challenges and complexities

European Union and Strategy Kjell Engelbrekt, Jan Hallenberg, 2010-09-13 This edited volume sets out to explore the paradox that the European Union EU produces policies with strategic qualities but lacks the institutions and concepts to engage in strategic reasoning and action proper The book has a two fold agenda exploring current EU external policies that are or seem to be linked to strategic priorities and also studying the concept of strategy in the particular context of EU decision and policymaking The volume first examines the character of the Union as a strategic actor at this stage of its development It then explores the ability of the Union to act and otherwise influence both its periphery and the wider world focusing in particular on how it is perceived by other actors The final section comprises personal assessments by a group of contributors regarding the character of the union as a strategic actor in the present and future When these are pieced together a picture emerges of a European strategy in the making albeit one that so far is modest and partial This book will be of interest to students of European Security European Politics and IR

The Idea of Europe, 2021-03-22 Recent developments within and beyond Europe have variously challenged the very idea of Europe calling it into question and demanding reconsideration of its underlying assumptions The essays collected here reassess the contemporary position of a perceived European identity in the world overshadowed as it is by the long antecedents and current crisis of triumphalist Eurocentrism While Eurocentrism itself is still a potent mind set it is now increasingly challenged by intra European crises and by the emergence of autonomously non European perceptions of Europe The perspectives assembled here come from the fields of political cultural and literary history contemporary history social and political science and philosophy Contributors are Damir Arsenijević Luiza Bialasiewicz Vladimir Biti Lucia Boldrini Gerard Delanty César Domínguez Nikol Džubić Rodolphe Gasché Aage Hansen Lene Shigemitsu Inaga Joep Leerssen and Vivian Liska

Territory, War, and Peace John A. Vasquez, Marie T. Hennehan, 2023-04-14 This book presents a collection of new and updated essays on what has come to be known as the territorial explanation of war The book argues that a key both to peace and to war lies in understanding the role territory plays as a source of conflict

and inter group violence Of all the issues that spark conflict territorial disputes have the highest probability of escalating to war War however is hardly inevitable much depends on how territorial issues are handled More importantly settling territorial disputes and establishing mutually recognized boundaries can produce long periods of peace between neighbors even if other salient issues arise While territory is not the only cause of war and wars arise from other issues territory is one of the main causes of war and learning how to manage it can in principle eliminate an entire class of wars This book will be of great interest to all students of war and conflict studies causes of war and peace international security and strategic studies John A Vasquez is Thomas B Mackie Scholar in International Relations at the University of Illinois Urbana Champaign He is author of *The Steps to War* 2008 with Paul Senese and *The War Puzzle Revisited* 2009 He has been president of the Peace Science Society International and the International Studies Association Marie T Henahan is Director of Internships and Lecturer Department of Political Science at the University of Illinois Urbana Champaign She is author of *Foreign Policy and Congress An International Relations Perspective* and co editor of *The Scientific Study of Peace and War*

Ethics, Technology and the American Way of War Reuben E. Brigety II, 2007-06-11 A new investigation into how the advent of precision guided munitions affects the likelihood of US policy makers to use force As such this is an inquiry into the impact of ethics strategy and military technology on the decision calculus of national leaders Following the first Gulf War in 1991 this new study shows how US Presidents increasingly used stand off precision guided munitions or PGMs especially the Tomahawk cruise missile either to influence foreign adversaries to make specific policy choices or to signal displeasure with their actions Such uses of force are attractive because they can lead to desirable policy outcomes where conventional diplomacy has failed but without the large cost of lives economic resources or political capital that result from large scale military operations In a post 9 11 world understanding alternative uses of force under significant policy constraints is still of supreme importance

Globalizing Justice for Mass Atrocities Chandra Lekha Sriram, 2013-05-13 This major new study examines the developing practice of universal jurisdiction as well as the broader phenomenon of globalizing justice and its ramifications With a detailed overview of the contemporary practice of universal jurisdiction it discerns three trends at work pure universal jurisdiction universal jurisdiction plus and non use It also argues that these disparities in practice should raise serious concerns as to the legitimacy and perceived legitimacy of such globalized justice It then turns to a further consideration that of globalized justice precisely because it takes place far from the locus of the crime and is therefore externalized and may fail to achieve many of its putative goals In addition this is a key assessment of civil accountability through the use of the Alien Tort Claims Act in the United States It details how the use of civil penalties may offer new avenues for redress particularly with relation to group accountability whether that of armed groups or of corporations However it balances this approach to accountability with recognition of certain flaws within externalized criminal accountability This study also focuses on mixed tribunals or other methods of internationalized justice as viable alternatives

which may avoid some of the problems with external justice but are themselves far from perfect Mixed or hybrid tribunals in East Timor and Sierra Leone represent different models of hybrid justice and provide the reader with excellent examples of these new forms of justice in action This book will be of great interest to all students and scholars of human rights international law and political science *War as Risk Management* Yee-Kuang Heng, 2006-04-18 This book is about the reconfiguration of war as risk management in the post Cold War post September 11 era Confronted with ill defined wars against complex security risks such as terrorism and WMD proliferation the main aim is to suggest and critically analyse an innovative inter disciplinary approach to the transformation of war debate **Understanding Emerging Security**

Challenges Ashok Swain, 2013 This book offers an overview of emerging security challenges in the global environment in the post Cold War era After the fall of the Berlin Wall and the subsequent shifting of international political environment a new broader concept of security began to gain acceptance This concept encompassed socio economic environmental challenges such as resource scarcity and climate change water sharing issues deforestation and forest protection measures food and health security and large population migration The book examines the causes and consequences of these emerging security threats and retains a critical focus on evolving approaches to address these issues The author attempts to develop a framework for sustainable security in a rapidly changing global political landscape which seeks to bring states and societies together in a way that addresses weaknesses of the evolving international system Moreover through a detailed analysis of the emerging security issues and their pathways the book further argues that the evolving processes not only pose critical challenges but also provide remarkable opportunity for cooperation and collaboration among and within various stakeholders This book will be of much interest to students of global security war and conflict studies peace studies and IR in general

Transitional Justice, Peace and Accountability Jessica Lincoln, 2011-03-18 The book looks at the outreach and communication strategies employed by internationalised courts to try to understand the wider impact of international justice This book critically examines the role of outreach within international justice focusing specifically on the role of outreach at the Special Court for Sierra Leone SCSL It contributes to understanding of the relationship between international courts and the affected populations an area currently underexplored and little understood The assumption that justice brings peace underpins much of the thinking and indeed action of international justice yet little is known if this is actually the case Significant questions surrounding the link between peace and justice remain do trials deter would be war criminals is justice possible for the most heinous crimes can international justice replace local justice This book explores these questions in relation to recent developments in international justice that have both informed and shaped the creation of the hybrid tribunal in Sierra Leone Through empirical analysis *Transitional Justice Peace and Accountability* answers these questions and provides an insight into individual and community perceptions of international justice This book will be of much interest to students of transitional justice war crimes peace and conflict studies human rights international law and IR in general

Explaining War and Peace Jack Levy, Gary Goertz, 2007-06-18 This edited volume focuses on the use of necessary condition counterfactuals in explaining two key events in twentieth century history the origins of the First World War and the end of the Cold War Containing essays by leading figures in the field this book analyzes the causal logics of necessary and sufficient conditions demonstrates the variety of different ways in which necessary condition counterfactuals are used to explain the causes of individual events and identifies errors commonly made in applying this form of causal logic to individual events It includes discussions of causal chains contingency critical junctures and powder keg explanations and the role of necessary conditions in each Explaining War and Peace will be of great interest to students of qualitative analysis the First World War the Cold War international history and international relations theory in general

Global Security and the War on Terror Paul Rogers, 2007-07-04 As the War on Terror evolves into the Long War against Islamofascism it demands an enduring commitment to ensuring the security of the United States and its allies This policy is based on the requirement to maintain control in a fractured and unpredictable global environment while paying little attention to the underlying issues that lead to insecurity It is an approach that is manifestly failing as the continuing problems in Afghanistan and Iraq demonstrate Moreover control implies the maintenance of a global order that focuses on power remaining in the hands of a transnational elite community principally focused on North America and Western Europe but extending worldwide This elite largely ignores socio economic divisions and environmental constraints and sees continuing stability as being best achieved by the maintenance of the status quo using force when necessary This collection of essays by Professor Paul Rogers argues that this post Cold War security paradigm is fundamentally misguided and unsustainable It concludes with two new essays on the need for a new conception of global security rooted in justice and emancipation Global Security and the War on Terror will be essential reading for students and scholars of security studies the Cold War international relations and development studies

Russian Energy Policy and Military Power Pavel K. Baev, 2012-12-06 This book examines the interplay between energy policy and security policy under Vladimir Putin and his drive to re establish Russia's greatness Assessing the internal contradictions of this policy the book argues that Russia's desire to strengthen its role of energy security provider is undermined by its inability to secure growth in production of oil and gas Further the pressing demand to channel more resources into the military industrial complex clashes with the growing need to invest in the energy complex and the priority granted to strategic forces deprives the conventional forces of strike power and strategic mobility In conclusion the author anticipates how these contradictions could be resolved and suggests three short scenarios for Russia's continuing transition in the next decade This book will be of interest to students of Russian politics European politics and international security
