Gurdjieff Joseph Azize, 2020 This is the first analysis of all of Gurdjieff's published internal exercises together with those taught by his students George and Helen Adie It includes a fresh biographical study of Gurdjieff with ground breaking observations on his relationships with P D Ouspensky and A R Orage especially why he wanted to collaborate with them and why that broke down It shows that Gurdjieff was fundamentally a mystic and that his contemplation like methods were probably drawn from Mt Athos and its hesychast tradition It shows the continuity in Gurdjieff's teaching but also development and change His original contribution to Western Esotericism lay in his use of tasks disciplines and contemplation like exercises to bring his pupils to a sense of their own presence which could to some extent be maintained in daily life in the social domain and not only in the secluded conditions typical of meditation It contends that he had initially intended not to use contemplation like exercises as he perceived dangers to be associated with these monastic methods and the religious tradition to be in tension with the secular guise in which he first couched his teaching As Gurdjieff adapted the teaching he had found in Eastern monasteries to Western urban and post religious culture he found it necessary to introduce contemplation His development of the methods is demonstrated and the importance of the three exercises in the Third Series
