aging were largely overlooked as subject matter for research during the early stages in the development of all basic sciences it was inevitable that students would eventually become curious about the final processes of maturation Events of recent years have hastened the need for social action on behalf of older people and consequently the need for scientific knowledge about their characteristics circumstances and requirements Processes of Aging Social and Psychological Perspectives will be of interest to research workers teachers and advanced students concerned with the psychological psychiatric psychosocial and socioeconomic aspects of aging Many of the theoretical and analytical discussions and the specific studies offer guidance for top level planners and policy administrators in public agencies and voluntary organizations This volume is highly sensitive to older people as such how they feel about themselves and the world and in the way they behave in relation to others It is must reading in the health and welfare of aging **Congressional Record** United States.
