deradicalization strategies through evidence based research The Origins of American Criminology Francis T. Cullen, Cheryl Lero Jonson, Andrew J. Myer, Freda Adler, 2017-09-08 The Origins of American Criminology is an invaluable resource Both separately and together these essays capture the stories behind the invention of criminology's major theoretical perspectives They preserve information that otherwise would have been lost There is urgency to embark on this reflective task given that the generation that defined the field for the past decades is heading into retirement This fine volume insures that their life experiences will not be forgotten The volume shows criminology to be a human enterprise Ideas are not driven primarily and often not at all by data Theories are not invented solely as part of the scientific process they are not inevitable American criminology's great theories most often precede the collection of data they guide and produce empirical inquiry not vice versa Theoretical paradigms are shaped by a host of factors scholars assumptions about the world drawn from their social constructs disciplinary content and ideology cognitive environments found in specific universities and the field's scholarly networks and quirks in a person's biography The volume demonstrates that humanity is what makes theory possible Diverse experiences when we were born where we have lived the unique trajectories of our personal life courses the disciplines and academic places we have ended up allow individual scholars to see the world differently **The Routledge Handbook on Radicalisation and Countering Radicalisation** Joel Busher, Leena Malkki, Sarah Marsden, 2023-11-28 This handbook provides a theoretical and methodological exploration of the research on radicalisation and counter radicalisation one of the most influential concepts in Security Studies International Relations and Peace and Conflict Studies Sitting at the heart of high profile research and policy agendas on preventing and countering violent extremism P CVE radicalisation as a concept has transformed the way researchers policymakers and societies think about how to counter terrorism and political violence Deliberations about radicalisation and countering radicalisation have become further embedded as efforts to prevent and counter violent extremism have been mainstreamed into other areas of public policy and practice such as education gender relations health peacebuilding aid and development Theoretically and methodologically pluralistic this handbook addresses radicalisation and countering radicalisation as they relate to a wide range of groups and milieus articulating diverse ideological positions drawing together insight and experience from multiple geographic and institutional settings integrating global perspectives and including scholarship focused on a range of policy fields This book will be an essential reference point for anybody working on radicalisation countering radicalisation or terrorism and political violence more broadly The insight that it provides will be relevant for both academics and members of relevant policy and practitioner communities Criminology Gennaro F. Vito, Ronald M. Holmes, 1994 Focusing on pure criminology not criminal justice systems topics this book takes a broad approach to criminological theory incorporating sociology psychology biology and ecology The text blends the theoretical and applied aspects of criminology incorporating timely topics such as gang violence substance abuse serial murder and satanic cults Writing from a social sciences

perspective the authors explore why and how crime occurs and how this knowledge can guide policy development The authors show the interplay of theory research and public policy throughout the text
