Humanities ,1995 Guarding Greensboro G. Ward Hubbs, 2003 Historian G Ward Hubbs first encountered the Confederate soldiers known as the Greensboro Guards through their Civil War diaries and letters Later he discovered that the Guards had formed some forty years before the war soon after the founding of the Alabama town that was their namesake Guarding Greensboro examines how the yearning for community played itself out across decades of peace and war prosperity and want Greensboro sprang up as a wide open frontier town in Alabama s Black Belt an exceptionally fertile part of the Deep South where people who dreamed of making it rich as cotton planters flocked Although prewar Greensboro had its share of overlapping communities ranging from Masons to school improvement societies it was the Guards who brought together the town s highly individualistic citizenry A typical prewar militia unit the Guards mustered irregularly and marched in their finest regalia on patriotic holidays Most significantly they patrolled for hostile Indians and rebellious slaves In protecting the entire white population against common foes Hubbs

argues the Guards did what Greensboro's other voluntary associations could not move citizens beyond self interest As Hubbs follows the Guards through their Civil War campaigns he keeps an eye on the home front on how Greensborians shared a sense of purpose and sacrifice while they dealt with fears of a restive slave populace Finally Hubbs discusses the postwar readjustments of Greensboro's veterans as he examines the political and social upheaval in their town and throughout the South Ultimately Hubbs argues the Civil War created the South of legend and its distinctive communities

The New Encyclopedia of Southern Culture Judith H. Bonner, Estill Curtis Pennington, Charles Reagan Wilson, 2013-01-14 From the Potomac to the Gulf artists were creating in the South even before it was recognized as a region The South has contributed to America's cultural heritage with works as diverse as Benjamin Henry Latrobe's architectural plans for the nation's Capitol the wares of the Newcomb Pottery and Richard Clague's tonalist Louisiana bayou scenes This comprehensive volume shows how through the decades and centuries the art of the South expanded from mimetic portraiture to sophisticated responses to national and international movements The essays treat historic and current trends in the visual arts and architecture major collections and institutions and biographies of artists themselves As leading experts on the region's artists and their work editors Judith H Bonner and Estill Curtis Pennington frame the volume's contributions with insightful overview essays on the visual arts and architecture in the American South

Lessons in Likeness Estill Curtis Pennington, 2011 Between 1802 when the young Kentucky artist William Edward West began to paint portraits while on a downriver journey and 1920 when the last of Frank Duveneck's students worked in Louisville a large number of notable portrait artists were active in Kentucky and the Ohio River Valley In Lessons in Likeness Portrait Painters in Kentucky and the Ohio River Valley 1802-1920 Estill Curtis Pennington charts the course of those artists as they painted a variety of sitters drawn from both urban and rural society The work is illustrated when possible from The Filson Historical Society collection of some four hundred portraits representing one of the most extensive holdings available for study in the region Portraiture involves artists and subjects known as sitters and is an art that combines elements of biography aesthetics and cultural history Private portraits often attract an oral history that enlivens the more colorful aspects of local tradition and culture Public portraits of towering figures such as George Washington Henry Clay and Abraham Lincoln were often reproduced in printed format to satisfy popular demand and subsequently attained an iconic timeless status Lessons in Likeness is organized in two parts Part One the cultural chronology serves as a backdrop to the biographies of the portrait artists This section identifies stylistic sources and significant historical moments that influenced the artists and their milieus Rather than working in isolation portrait artists were connected to the world around them and influenced by prevailing trends in their trade Early in the nineteenth century for instance Matthew Jouett journeyed to Boston for study with Gilbert Stuart and upon his return to Kentucky painted in a style that subsequently influenced an entire generation Later artists notably Oliver Frazer and William Edward West studied the lessons of Thomas Sully in Philadelphia Sully popularized the lush warmly colored and highly flattering style of

portraiture practiced by many of the itinerant artists whose careers were facilitated by the introduction of steam and rail travel. The Civil War provoked a dramatic shift in the cultural terrain further augmented by the rise of photography and the emergence of academic art centers. Painters who had previously worked with a master painter or learned on their own were now able to study at established schools especially in Cincinnati which became one of the leading centers for the teaching of art in late nineteenth century America. Several of the teachers there Frank Duveneck and Thomas Satterwhite Noble in particular had firsthand experience with avant garde European styles notably the realism and naturalism practiced in Munich and Paris in the last quarter of the nineteenth century and then taught in the art schools of New York and Philadelphia. Part Two profiles the artists from this area and period who have appeared in previous art historical literature and have an identifiable body of work represented in public and private collections. Individual biographies provide details of the artists' lives sources for further study and locations of works in public collections.

A Legacy of Leadership Clayton McClure Brooks, 2013-04-22 In *A Legacy of Leadership* top scholars and journalists create a new framework for understanding the contributions governors have made to defining democracy and shaping American history. Structured chronologically *A Legacy of Leadership* places governors in contrast and comparison with one another as well as within the context of their times to show how a century of dramatic developments war and peace depression and prosperity led governors to rethink and expand their positions of leadership. The nine chapters of compelling new scholarship presented here connect the experiences of dynamic individual governors and the evolution of the gubernatorial office to the broader challenges the United States has faced throughout the turbulent twentieth century. Taken together they demonstrate how interstate cooperation became essential as governors increasingly embraced national and international perspectives to promote their own states' competitiveness. Published for the centennial of the National Governors Association *A Legacy of Leadership* is an eloquent demonstration of how to a great extent we live in a country that governors created.
