Madness And Social Representations:

Madness and Social Representations Denise Jodelet, 1991 The introduction of the mentally ill into the community in families in central France is at the heart of this study The book examines the psychological and social effects of this development It uses this example as a means of exploring the notion of otherness more broadly

Madness and Social Representations Denise Jodelet, 1991-01-01 A striking account of a colony for the mentally ill that forces a reconsideration of madness in society What happens when the mentally ill are not isolated from society but are instead welcomed into it and invited to take a place in the fabric of the community Are fear and rejection replaced by the understanding and sympathy often engendered by familiarity Or are the barriers between the sane and the mad only strengthened We have experienced a taste of this scenario in the U S in the last decade with the new emphasis on de institutionalization but Denise Jodelet takes us to an extraordinary community in France where the mentally ill have assumed a visible and prominent role for more than seventy years The small French town of Ainay le Chateau and its environs are the site of a family colony for men established in 1900 Here the patients lodgers live with ordinary families foster parents hold jobs and are free to move about the countryside Jodelet's chronicle of daily life in the colony is made rich and vivid by extensive ethnographic material as she unravels a complex set of relationships ultimately finding that while some of the barriers between the other and the larger society have been overcome new ones have arisen in their place This unique social experiment provides invaluable social and cultural insights illuminating many fundamental issues in psychology psychiatry and sociology

critical review of a key topic this book shows how different empirical approaches to the study of social representations are viable and can be complementary Empirical examples of the analysis of particular social representations from museums to new technology are included The ten chapters in the first half of the book present the key arguments concerning the relationship between the theory and methods The second half looks at a wide variety of research topics Of central concern to all the topics are the circumstances under which one can be certain of having described a social representation The answer lies in the use of multivariate statistical analysis the use of which is clearly explained
