thinking on a range of questions both related specifically to the discipline of international trade law itself and to the outside face of international trade law and its intersection with States and other aspects of the international system It examines the economic and institutional context of the world trading system its substantive law including regional trade regimes and the settlement of disputes The final part of the book explores the wider framework of the world trading system considering issues including the relationship of the WTO to civil society the use of economic sanctions state responsibility and the regulation of multinational corporations Oxford Handbooks offer authoritative and up to date surveys of original research in a particular subject area Specially commissioned essays from leading figures in the discipline give critical examinations of the progress and direction of debates Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities and social sciences

well as the possibilities for the future It considers the intersection of international trade law with States the economic and institutional context of the world trading system the framework of its substantive law and the balance of trade objectives versus ethical responsibilities The book concludes by offering analysis of new trade law developments in the agricultural digital and financial sectors as well as outlining the settlement of trade law disputes both in the WTO and bilateral regional trade agreements The second edition broadens the scope of analysis beyond the WTO analysing regional trade agreements and preferential trade arrangements including the Trans Pacific Partnership and Canada EU Trade Agreement The new edition also considers developments within the WTO such as in the area of agricultural export subsidies and the Trade Facilitation Agreement **World Trade Information Service** United States.
