Manual Of Herbaceous Ornamental Plants:

Manual of Herbaceous Ornamental Plants Steven M. Still, 1994 PREFACE This text provides information about common and uncommon annuals biennials perennials bulbs ornamental grasses herbs and hardy ferns that are adapted to most climates of the United States and Canada The fourth edition is larger than the previous edition and I expect that a future edition will be even larger The learning process of a plantsman is a life long endeavor and I will continue to discover new plants in my travels The idea for this text started developing when I was a student in a herbaceous plants course at the University of Illinois At that time I realized that there was no one text that included identification characteristics and the ornamental and cultural features necessary to obtain a complete understanding of the subject This idea was further reinforced when I became an instructor of herbaceous plants at Kansas State University I found it impossible to recommend any one book for student use because each had its advantages and disadvantages This text provides the student the professional and the home gardener with illustrations and concise treatment of plant information I have had an opportunity to travel extensively in the United States Canada Europe and Great Britain Information gained in these travels has been incorporated in this expanded fourth edition There are over 1 20 new plant descriptions and now a total of 384 color photos Wildflowers and herbs are two examples of plant groups where coverage has been expanded Since the printing of the third edition of the Manual of Herbaceous Ornamental Plants I have received many helpful suggestions of how this text could be enhanced I am indebted to those individuals who took time to contact me with their suggestions I have assimilated their comments and incorporated them in the fourth edition The art work for the fourth edition was done by Lynda Chandler

Manual of Herbaceous Ornamental Plants Steven Still, 1988-01-01 **Herbaceous Ornamental Plants. Slide Script** Steven M. Still, 1984 *Herbaceous Ornamental Plants* Steven M. Still, 1988 *Herbaceous Ornamental Plants* Stephen Still, 1986 Illustrated script which accompanies the slide series of the same title sold separately cat 2046S Depicts a series of 338 color slides covering 150 herbaceous perennial plants The narration provides a description of each species cultural tips and a brief statement regarding how the plant is used in a landscape setting In general the set contains two slides of each plant a close up and a view of the plant in the landscape Flower Breeding and Genetics Neil O. Anderson, 2007-10-04 Floriculture is one of the fastest growing sectors of commercial agriculture This book provides a unique and valuable resource on the many issues and challenges facing flower breeders as well as the industry at large Featuring contributions from 32 international authorities it offers tools and directions for future crop domestication and enhancement as well as offers essential information for breeding a wide range of floriculture crops *The Complete Plant Selection Guide for Landscape Design* Marc C. Stoecklein, 2011-03-15 This book is a quick and easy to use reference guide for choosing plant material for landscape designs This reference manual includes comprehensive lists with search criteria for each of the major plant groups including trees shrubs groundcovers perennials vines grasses and ferns These plant groups contain hundreds of

specific species varieties and cultivars that are readily available in the marketplace from the major production nurseries Landscape architects designers contractors or anyone who designs with plants can easily choose plants that will work on their site The book is technical enough for the professional yet simple enough to be used by the layperson Both botanical and common names are used and an extensive amount of cultural and environmental information is presented While many other books of this kind give only basic information such as sun shade height width there are so many as 30 specific categories for each plant group The categories cover such important criteria as light and soil requirements zone hardiness height and width pest and disease susceptibility urban tolerance and tolerance to salt and drought The lists also include many criteria often overlooked such as growth rates overall messiness root systems minimal fall clean up maintenance levels soil PH and landscape value use and many visual characteristics such as texture foliage color and fall colors bloom colors and seasons shapes and forms attractive bark and foliage and more There is also a candid Pros Cons section covering some realistic considerations for each of the plant species groups
