Map Design For Mobile Application:

Designing Map Interfaces Michael Gaigg, 2023-03-14 Create useful and usable map apps that your users will love Turn your next map app project into a success with Designing Map Interfaces Patterns for Building Effective Map Apps Whether you're configuring an out of the box solution building an app using one of the readily available app builder tools or working on a custom app project this book will guide you toward developing more useful and usable apps Current courses for application development focus on technology and architecture rather than the tenets of interface design This book teaches GIS professionals developers and designers the principles and best practices that will help them create stunning consumer grade apps Designing Map Interfaces provides a language for planning and building map apps The elements of this language are made up of user interface UI patterns Each pattern describes a solution to an observed and recurring problem in UI design This book explains when to use the pattern why it is important and what to consider and in turn will help readers make educated decisions on what why when and how to solve problems to make their apps work Throughout the book patterns are illustrated through real world examples Key topics include getting started with design selecting the right layout interacting with the map dealing with complex data designing for mobile devices building single purpose apps and common mistakes and how to avoid them This book is aimed at anyone that configures solution engineers GIS professionals or builds developer community designers map apps especially the fast growing group of users who employ application builders and tools that create apps to publish their own data and maps on the web Designing Map Interfaces fills the gap that documentation lacks practical tips on how to assemble a meaningful UI This book is the essential guide to designing map interfaces that are usable and efficient and look good in the process

Designing Software for the Mobile Context Roman Longoria, 2004-06-16 Roman Longoria The goal of this book is to provide a useful and timely guide to the practitioner who designs or develops mobile applications The contributors to this book are leaders in the user interface UI community actively working in mobile platform technology and mobile application design Thus this book offers the reader unique insight into the latest technologies market trends design ideas and usability data We provide the reader with the latest information that will have direct and immediate impact on a broad scope of product design decisions including those for voice phone and personal digital assistant PDA applications In other words this book is written by practitioners for practitioners When I approached my coauthors about writing a chapter I had only a few criteria First each author should have unique experience and expertise about a certain aspect of mobile applications Second that the authors be able to provide an introduction to the technologies with which they work Third that each chapter include case studies and lessons learned from empirical usability evaluations And fourth that each author include in the chapter some fundamental knowledge that they wish they had known when they got started designing for the mobile context

The Map Reader Martin Dodge, Rob Kitchin, Chris Perkins, 2011-05-09 WINNER OF THE CANTEMIR PRIZE 2012 awarded by the Berendel Foundation The Map Reader brings together for the first

Evaluating Participatory Mapping Software Charla M. Burnett, 2023-04-21 This volume provides a framework for evaluating geospatial software for participatory mapping The evaluation is based on ten key indicators ethics cost technical level inclusiveness data accuracy data privacy analytical capacity visualization capacity openness and accessibility i e mobile friendly or offline capabilities Each application is evaluated by a user and cross analyzed with specific case studies of the software's real world application This framework does not discriminate against assessing volunteered geographic information VGI applications as a form of participatory mapping in circumstances that its application is spearheaded by underrepresented groups with the intent to empower and spark political or behavioral change within formal and informal institutions Each chapter follows a strict template to ensure that the information within the volume can be updated periodically to match the ever changing technological environment The book covers ten different mapping applications with the goal of creating a comparative evaluation framework that can be easily interpreted by convening institutions and novice users This will also help identify gaps in software for participatory mapping which will help to inform application development in the future and updates to current geospatial software

Springer Handbook of Geographic Information Wolfgang Kresse, David M. Danko, 2012-02-21 Computer science provides a powerful tool that was virtually unknown three generations ago Some of the classical fields of knowledge are geodesy surveying cartography and geography Electronics have revolutionized geodetic methods Cartography has faced the dominance of the computer that results in simplified cartographic products All three fields make use of basic components such as the Internet and databases The Springer Handbook of Geographic Information is organized in three parts Basics Geographic Information and Applications Some parts of the basics belong to the larger field of computer science However the reader gets a comprehensive view on geographic information because the topics selected from computer science have a close relation to geographic information The Springer Handbook of Geographic Information is written for scientists at universities and industry as well as advanced and PhD students
