What African American Parents Want Educators to Know Gail L. Thompson, 2003-05-30 Thompson designed an empirical study to gather feedback from African American parents on numerous issues pertaining to their children s schooling experiences The results discussed in this book can be utilized to

improve the schooling experiences of African American children nationwide The African American parents guardians who participated in this study were biological parents in two parent homes single parents grandparents foster parents and stepparents who were rearing school age children Some had been deterred from completing their own formal education as a result of peer pressure temptation outside of school or stressful circumstances Others had positive schooling experiences and stable childhoods Regardless of the differences in their background experiences the majority of these parents or guardians were single minded about wanting a better life for their children believing that a good K 12 education and college education were crucial to their children s advancement And while most believed resolutely in the hope offered by the public school system they recognized that schools couldn t do it all African American parents and guardians are willing to work with teachers and administrators to ensure that their children receive a quality education Yet if the historic achievement gap is ever to be eradicated teachers administrators researchers and policymakers must be more willing to view African American parents guardians as assets African American parents guardians must be invited to verbalize their concerns and those concerns must be taken seriously to effect meaningful and lasting change in the public school system
