Magic Lantern Empire John Phillip Short,2012-11-15 Magic Lantern Empire examines German colonialism as a mass cultural and political phenomenon unfolding at the center of a nascent conflicted German modernity John Phillip Short draws together strands of propaganda and visual culture science and fantasy to show how colonialism developed as a contested form of knowledge that both reproduced and blurred class difference in Germany initiating the masses into a modern market worldview A nuanced account of how ordinary Germans understood and articulated the idea of empire this book draws on a diverse range of sources police files spy reports pulp novels popular science writing daily newspapers and both official and private archives In Short s historical narrative peopled by fantasists and fabulists by impresarios and amateur photographers by ex soldiers and rank and file socialists by the luckless and bored along the margins of German society colonialism emerges in metropolitan Germany through a dialectic of science and enchantment within the context of sharp class conflict He begins with the organized colonial movement with its expert scientific and associational structures and emphatic exclusion of the masses He then turns to the grassroots colonialism that thrived among the lower classes who experienced empire through dime novels wax museums and panoramas Finally he examines the ambivalent posture of Germany s socialists who mounted a trenchant critique of colonialism while in their reading rooms workers spun imperial fantasies It was from these conflicts Short argues that there first emerged in the early twentieth century a modern German sense of the global The Throne of the Great Mogul in Dresden Dror Wahrman,2023-04-25 A masterful deciphering of an extraordinary art object illuminating some of the biggest questions of the eighteenth century The Throne of the Great Mogul 1701 8 is a unique work of European

decorative art an intricate miniature of the court of the Mughal emperor Aurangzeb depicted during the emperor's birthday celebrations It was created by the jeweler Johann Melchior Dinglinger in Dresden and purchased by the Saxon prince Augustus the Strong for an enormous sum Constructed like a theatrical set made of gold silver thousands of gemstones and amazing enamel work it consists of 164 pieces that together tell a detailed story Why did Dinglinger invest so much time and effort in making this piece Why did Augustus in the midst of a political and financial crisis purchase it And why did the jeweler secrete in it messages wholly unrelated to the prince or to the Great Mogul In answering these questions Dror Wahrman while shifting scales from microhistory to global history opens a window onto major historical themes of the period the nature of European absolutism the princely politics of the Holy Roman Empire the changing meaning of art in the West the surprising emergence of a cross continental lexicon of rulership shared across the Eastern Hemisphere and the enactment in jewels and gold of quirky contemporary theories about the global history of religion

Sick Houses Leila Taylor, 2025-02-11 Explores the architecture of haunted houses uncanny domestic spaces and how the horror genre subverts and corrupts the sanctity of home Horror begins at home From family homes in Amityville to Gothic mansions in Los Angeles and the Unabomber's cabin houses often capture and contain the horror that has happened within them Sick Houses crosses the threshold of these eerie spaces to explore how different types of architecture become vessels for terror and how these spaces meant to shelter us instead become the source of our deepest fears Using film television and literature to explain why we are drawn to haunted and haunting places Sick Houses is a must read for anyone who has ever looked at a house and sensed there might be something unsettling going on inside

The Contemporary Archaeology of Emotions: Re-Framing the Past and Present Tuuli Matila, 2025-09-30 This SpringerBrief examines emotions in the past through contemporary archaeological materials The author explores this topic using the context of a former working class neighbourhood in northern Finland that existed during the Cold War era 1947-1987 Finland offers an interesting context to examine this because of the twofold emotional frames the Cold War and capitalism versus the nascent welfare state The push and pull between the values emphasizing universal care and compassion against the hardline militarisation and financial competition results in accessing different and sometimes contradictory emotions It also affords a gendered view into the past and such an angle could be attempted in the context of the deep past as well This book offers several examples on how emotions could be accessed in the deep past and draws parallels between the examples from a contemporary western country and various archaeological cultures and contexts Emotions can be a bridge to access the secrets of human behavior Such bridging is the core strength of archaeological education but rarely are emotions acknowledged in the process Lastly this book underlines the role of emotions specifically empathy in archaeological education and in destabilizing contemporary political notions on social norms and contracts
