## **Minidragons Fragile Economic Miracles In The Pacific:**

**Minidragons** Steven M. Goldstein, 2019-04-01 The purpose of this book is to introduce one of the most significant international developments of the post World War II era the dramatic socio economic transformation achieved by Hong Kong Singapore South Korea and Taiwan In less than three decades these minidragons of Asia have become major economic players not only in the economy of the Pacific rim but in the global economic system as well In the essays which follow the nature of this transformation is charted its causes are described and some assessment is made of the factors that will shape the future of these fragile economic miracles This volume was originally conceived as a companion to the television series entitled Minidragons an international co production of Maryland Public Television MPT with NHK Japan and Film Australia

*Minidragons* Steven Martin Goldstein, 1991-01-01 Tracing the post war development of Hong Kong Singapore South Korea and Taiwan it s hard to resist characterizing it as miraculous This illustrated volume brings the economic transformation of Asia to life and examines the future prospects for the minidragons **Rethinking Asia's Economic**

**Miracle** Richard Stubbs, 2017-09-08 In the new edition of this important contribution to understanding both the Asian economic miracle and the 1997 8 crisis Richard Stubbs assesses the main explanations to date and updates the analysis to take account of globalization and the remarkable economic rise of China **Women in the Age of Economic**

**Transformation** Nahid Aslanbeigui, Steven Pressman, Gale Summerfield, 2005-08-04 Changes are sweeping the world economy and are most apparent in post socialist Europe and in the developing world This volume examines the impact these changes are having on women The authors discuss the evidence of gender bias and reach some telling if unsurprising conclusions Regardless of the country involved the findings point to consistent female disadvantage in the transformation process *Emerging Urbanity* Richard Marshall, 2013-09-05 Discussions on the global economy focus on the hyper mobility

of capital the possibility of instantaneous transmission of information and money around the globe the centrality of information outputs to our economic systems and emphasise the neutralisation of geography and of places What is ignored however is that even the most advanced information industries need a material infrastructure of buildings and work processes and considerable agglomeration in order to operate in global markets Further the globalisation of economic activity has brought with it not only a vast dispersal of offices and factories but also a growing importance of central functions to manage and coordinate such worldwide networks of activities The development of global urban projects is one manifestation of this move towards centrality in urban situations These large scale urban projects are the result of governments seeking competitive advantage in the global economy They are critical components of a nation s global infrastructure In the booming economies of the Asia Pacific Rim prior to the Asian Economic Crisis these urban developments were seen as key components of national economic policies In their making they require a conscious effort to arrange material infrastructure and reinforce that there is a role for urban design in this making *Emerging Urbanity* is an exploration

of this role in nine global urban projects in the Asia Pacific Rim      **East Asia at the Center** Warren I. Cohen, 2023-08-15

Long before the arrival of Western emissaries and powers East Asian peoples and states were deeply involved in world affairs. In this sweeping account Warren I. Cohen explores four millennia of international relations from the vantage points of China, Japan, Korea, and Southeast Asia. Writing incisively and authoritatively for readers at all levels, Cohen paints a broad but revealing portrait of East Asia's place in the world. He defines the region's boundaries widely, looking beyond China, Japan, and Korea to include Southeast Asia and extends the scope of international relations to consider the vital role of cultural and economic exchanges. Cohen examines the system of Chinese domination in the ancient world, the exchanges between East Asia and the Islamic world, Chinese sea voyages to Arabia and East Africa, and the emergence of a European-defined international system. He chronicles the new imperialism of the 1890s, the ascendancy of Japan, the trials of World War II, the drama of the Cold War, and the transformations of East Asian states toward the close of the twentieth century. By showing that East Asia has often been preeminent on the world stage, this book not only recasts the past but also adds crucial historical perspective on international politics today. This second edition of *East Asia at the Center* features new material on the first decades of the twenty-first century.

**Globalizing Taipei** Reginald Kwok, 2006-05-11 Taipei's quest to become a global city is the key to its urban development. *Globalizing Taipei* looks at this Asian Dragon, a major city in the South China Growth Triangle and a centre for transnational production, revealing how the development of this capital has received firm state support but is conditioned by international and domestic politics. The book is divided into four parts: economic and spatial restructuring, state and society realignment, social differentiation, and cultural reorientation. Each analyzes the interaction of international state and local politics in the shaping of the city's urban environment since World War II. All contributors to this edited volume are Taiwan scholars presenting critical insiders' views. Based on each author's specialization and research focus, each chapter provides an in-depth consideration of one of Taipei's developmental issues generated by globalization. Collectively, they provide broad, insightful, and coherent coverage of this crucial time in Taipei's global transmutation.

**Globalization, Culture and Inequality in Asia** Timothy J. Scrase, Todd Joseph Miles Holden, Scott Baum, 2003. Contemplating globalization from a sociological perspective, it is without doubt that a major site for social, political, economic, and cultural change in the new millennium lies in the Asian region. The chapters in this book seek to describe and analyze a number of key aspects of social and cultural change wrought by globalization in the Asian region. The underlying theme in the book is the multi-dimensional way in which globalization, in the form of ideas, practices, and technology, have introduced social inequalities in specific contexts. In particular, the book examines how inequality has been reproduced, challenged, and theorized in Asia by the advent of globalizing culture. Written by experienced and established scholars, the study provides both theoretical explanation and discussion and analysis of empirical data from a range of social, cultural, and political-economic perspectives and draws on studies from several countries in the region.      The Elgar

has been adapted by Southeast Asians to suit their own particular needs This book begins by building a framework for understanding democracy in its broadest sense The authors investigate the uniquely Asian style of democracy which borrows democratic political institutions and meshes them with the cultural patterns specific to each country In separate chapters the authors trace the evolutionary historical processes within each country as well as citizen participation electoral practices and civil liberties The chapters end with an assessment of the prospects for democracy in that nation as well as an evaluation of whether democratic regimes are necessary for developing successful economies and societies in the new international era
