Minimalism DesignSource Encarna Castillo,2004-09-28 The term Minimalism has not always been used in a favorable sense especially in architecture and even today it may be the cause of some confusion and ambiguity The problem comes from the word s use in defining a creative current school or trend when in fact it refers to an aesthetic At the same time this aesthetic is not chronologically well defined either and moreover interacts with different disciplines This explains why we find minimalist buildings in periods very far apart from each other and in architects as different as Tadao Ando Eduardo Souto de Moura Jacques Herzog Pierre de Meuron or Luis Barrag n among others Minimalism DesignSource investigates the minimalism movement covering the last years of the decade of the 1990s and the first years of the twenty first century to inquires into the origins of the term minimalism and in how the minimalism phenomenon played out in other fields like art painting fashion and sculpture has affected minimalism in architecture define the result of the use of pure and simple lines the reduction of language elements and as far as architecture is concerned the investigation of the treatment of space and of building possibilities

Minimalism Encarna Castillo,2004 Minimalism Hartmut Obendorf,2009-06-12 The notion of Minimalism is proposed as a theoretical tool supporting a more differentiated understanding of reduction and thus forms a standpoint that allows definition of aspects of simplicity Possible uses of the notion of minimalism in the field of human computer interaction design are examined both from a theoretical and empirical viewpoint giving a range of results Minimalism defines a radical and potentially useful perspective for design analysis The empirical examples show that it has also proven to be a useful tool for generating and modifying concrete design techniques Divided into four parts this book traces the development of minimalism defines the four types of minimalism in interaction design looks at how to apply it and finishes with some conclusions

ARCHINESIA 5 Imelda Akmal (Editor in Chief), GOOD DESIGN IN ARCHITECTURE NOW One of the most important quite dominant processes in architecture is design process and the goal of architecture design is to obtain good design Good design has double meaning aesthetic and ethic In architecture the two should be united as a single goal that a design process should strive for Moreover an architectural product does not only effect its client and architect On a broader level architectural products also effect their surrounding environments In a large scale they may even have an effect on the economy and the social and political condition The question is How does an architectural design attain the label good design

M.

Seuren,2004-08-26 Noam Chomsky's current theory published in 1995 is known as The Minimalist Program and has been presented as his crowning achievement Minimalism has spawned in linguistics an entire research program despite being fundamentally misguided according to distinguished linguist and philosopher of language Pieter Seuren Seuren's accessible and spirited attack argues that the Minimalist Program is deeply flawed Seuren points to the original acrimonious split in the 1960s and 1970s between Chomsky's generative grammar and the alternative generative semantics proposed by his followers and argues that the latter theory was sounder and unfairly suppressed Seuren maintains that this suppression and the cult surrounding Chomsky and Minimalism more generally has done great damage to linguistics by impairing open discussion of empirical issues and excluding valid alternatives **A Theory of Minimalism** Marc Botha,2017-10-19
