Minimalism DesignSource Encarna Castillo,2004-09-28 The term Minimalism has not always been used in a favorable sense especially in architecture and even today it may be the cause of some confusion and ambiguity The problem comes from the word s use in defining a creative current school or trend when in fact it refers to an aesthetic At the same time this aesthetic is not chronologically well defined either and moreover interacts with different disciplines This explains why we find minimalist buildings in periods very far apart from each other and in architects as different as Tadao Ando Eduardo Souto de Moura Jacques Herzog Pierre de Meuron or Luis Barrag n among others Minimalism DesignSource investigates the minimalism movement covering the last years of the decade of the 1990s and the first years of the twenty first century to inquire into the origins of the term minimalism and in how the minimalism phenomenon played out in other fields like art painting fashion and sculpture has affected minimalism in architecture define the result of the use of pure and simple lines the reduction of language elements and as far as architecture is concerned the investigation of the treatment of space and of building possibilities

**Minimalism** Hartmut Obendorf,2009-06-12 The notion of Minimalism is proposed as a theoretical tool supporting a more differentiated understanding of reduction and thus forms a standpoint that allows definition of aspects of simplicity Possible uses of the notion of minimalism in the field of human computer interaction design are examined both from a theoretical and empirical viewpoint giving a range of results Minimalism defines a radical and potentially useful perspective for design analysis The empirical examples show that it has also proven to be a useful tool for generating and modifying concrete design techniques Divided into four parts this book traces the development of minimalism defines the four types of minimalism in interaction design looks at how to apply it and finishes with some conclusions

minimal structures to promote the notion of lightweight construction solutions and to allow maximum daylight into buildings

New Glass Architecture showcases the changing ways that aesthetics and methods for using glass have been developing since the 1990s The book begins with an introduction that traces the history of key moments in glass architecture from the stained glass windows of Chartres Cathedral to the Crystal Palace of 1851 and early constructions by John Soane Bruno Taut Le Corbusier and Mies van der Rohe Author Brent Richards explains the importance of glass artists in the second half of the 20th century and describes developments in glass technology over the last twenty years Beautifully illustrated with newly commissioned photographs by Dennis Gilbert the book features twenty five case studies of recent glass constructions from around the world by such leading architects as Foster and Partners Frank Gehry Herzog de Meuron Steven Holl Toyo Ito Associates Jean Nouvel Raphael Violy and Peter Zumthor Each building is illustrated in full color and accompanied by detailed drawings New Glass Architecture features these buildings and more Chapel of Ignatius Seattle Cond Nast Caf New York DZ Bank Berlin Kimmel Center for the Performing Arts Philadelphia Kunsthau Graz Austria Laban Dance Centre London Torre Agbar Barcelona
