Proceedings of the 12th International Symposium Continuous Surface Mining - Aachen 2014 Christian Niemann-Delius, 2014-09-20 This edited volume contains research results presented at the 12th International Symposium Continuous Surface Mining ISCSM Aachen

2014 The target audience primarily comprises researchers in the lignite mining industry and practitioners in this field but the book may also be beneficial for graduate students **Civil Engineering and Symmetry** Edmundas Kazimieras

Zavadskas, Jurgita Antuchevičienė, Romualdas Bausys, 2019-06-14 A topic of utmost importance in civil engineering is finding optimal solutions throughout the life cycle of buildings and infrastructural objects including their design manufacturing use and maintenance Operational research management science and optimization methods provide a consistent and applicable groundwork for engineering decision making These topics have received the interest of researchers and after a rigorous peer review process eight papers have been published in this Special Issue The articles in this Printed Edition demonstrate how solutions in civil engineering which bring economic social and environmental benefits are obtained through a variety of methodologies and tools Usually decision makers need to take into account not just a single criterion but several different criteria and therefore multi criteria decision making MCDM approaches have been suggested for application in five of the published papers the rest of the papers apply other research methods Most approaches suggested decision models under uncertainty proposing hybrid MCDM methods in combination with fuzzy or rough set theory as well as D numbers The application areas of the proposed MCDM techniques mainly cover production manufacturing engineering logistics and transportation and construction engineering and management We hope that a summary of the Special Issue as provided here will encourage a detailed analysis of the papers included in the Printed Edition **The Business of Mining** Ifan Odwyn

Jones, Mehrooz Aspandiar, Allison Dugdale, Neal Leggo, 2019-12-06 The Business of Mining complete set of three Focus books provides readers with a holistic all embracing appraisal of the analytical tools available for assessing the economic viability of prospective mines Each volume has a discrete focus This third volume commences with Our Earth its Minerals and Ore Bodies followed by a review of mineral exploration and sampling of mineral deposits It continues with detailed sections covering the reporting of mineral resources and reserves in Australia and concludes with the basic principles and application of the various methods of estimating the in situ mineral resources and ore reserves The books were written primarily for undergraduate applied geologists mining engineers and extractive metallurgists and those pursuing course based postgraduate programs in mineral economics However the complete series will also be an extremely useful reference text for practicing mining professionals as well as for consultant geologists mining engineers or primary metallurgists Economic

Evaluations in Exploration Friedrich-Wilhelm Wellmer, Manfred Dalheimer, Markus Wagner, 2007-11-29 This textbook now in its second English edition is originally a translation of the German textbook Rechnen für Lagerstättenkundler und Rohstoffwirtschaftler Teil 1 also translated into the Chinese and Russian languages Compared to the previous English and German editions the chapters have been updated with new examples and in many cases amended The textbook is intended for the economic geologist who deals with the evaluation of deposits at an early stage of development Once an exploration project has reached the feasibility stage the exact calculations that are necessary for a comprehensive technical and economic

assessment will be performed by a team of geologists mining engineers metallurgists and economists In the early stages of exploration however any evaluator of deposits must be able to cover the whole spectrum himself Since only order of magnitude parameters are available at this early stage the calculations can only yield order of magnitude results Precise calculations would even be misleading since the evaluation does not yet aim at accurate economic assessment but at making the right decision should the investigation be abandoned or should it be continued at higher costs and with more detailed methods
