Minorities and Indigenous Peoples Fareda Banda, Christine Chinkin, 2004-08-05 While it is generally acknowledged that women suffer discrimination women who are also members of minority or indigenous communities are particularly marginalized Like male members of minority and indigenous communities they lack access to political power and face discrimination in their access to services and rights However as women they face these problems and more The aim of this report is to encourage those working on minority and indigenous peoples rights to consider the issues from a gender perspective and to encourage those working on gender equality and women s rights to include minorities and indigenous

peoples within their remit The report is written by Fareda Banda and Christine Chinkin who are both international human rights lawyers and gender specialists It has an international law and advocacy focus First the basic concepts and relevant international human rights instruments are set out Then using case studies and examples from around the world the authors show how gender intersects with other forms of discrimination on the lives of some minority and indigenous peoples Key issues for minority and indigenous peoples are stressed and there is a nuanced discussion of the issue of culture which can be both a positive and negative force in relation to women's human rights The report concludes with a set of recommendations This report will be essential reading for anyone interested in issues of gender and the human rights of minorities and indigenous peoples

disparities and outcomes Overall this research demonstrates the increasing knowledge of gender variation at the population level At the same time it reveals the need for better survey questions additional data and inquiry into a broader subset of demographic questions for these populations as there is little understanding of fundamental demographic information including migration or spatial distribution of transgender populations fertility and household structure labor market outcomes or broader patterns of morbidity and mortality The research set forth in this book lays the groundwork for a trans demography that would produce population level knowledge of these populations and points researchers and policymakers toward needed areas of research conceptualization and data collection

Equality of Opportunity for Sexual and Gender Minorities John Arzinos,Christian De la Medina Soto,Clifton Cortez,2021-12-02

Despite legal and social advances in the past two decades sexual and gender minorities continue to face widespread discrimination and violence in many countries This discrimination and violence lead to exclusion which adversely impacts their lives as well as the communities and economies inwhich they live A major barrier to addressing this stigma and sexual orientation and gender identity SOGI based exclusion is the lack of SOGI specific data Robust quantitative data on differential development experiences and outcomes of sexual and gender minorities especially those in developing countries is extremely thin This paucity of data jeopardizes the achievement of the Sustainable Development Goals and countries commitment to the principle of leaving no one behind in the effort to end poverty and inequality

Equality of Opportunity for Sexual and Gender Minorities assesses the unique challenges that sexual and gender minorities face in six important areas i Criminalization and SOGI ii Access to education iii Access to the labor market iv Access to public services and social protection v Civil and political inclusion vi Protection from hate crimes This report covers numerous policy recommendations to prevent and eliminate discriminatory practices in all of the areas covered It also seeks to influence legislative changes and support research on institutions and regulations that can ultimately lead to poverty reduction and shared prosperity At the same time it acknowledges that the mere existence of inclusive laws and regulations does not ensure that sexual and gender minorities are free from discrimination the enforcement of those laws is crucial This publication the first in a series of studies will be expanded from the 16 countries included here to a wider set of countries for more in depth quantitative analysis and to identify possible correlations with socioeconomic outcomes It will seek to deepen knowledge facilitate peer learning of good practices and encourage reforms to increase the inclusion of sexual and gender minorities
