The seventeenth century* Lynn Thorndike, 1958      *'Behind' the Text: History and Biblical Interpretation* Zondervan, 2011-04-19 Christianity believes in a God who acts in history The Bible tells us the story of God's actions in Israel culminating in the ministry of Jesus of Nazareth and the spreading of the gospel from Jerusalem to Rome The issue of history is thus unavoidable when it comes to reading the Bible Volume 4 of the Scripture and Hermeneutics Series looks at how history has dominated biblical studies under the guise of historical criticism This book explores ways in which different views of history influence interpretation It considers the implications of a theology of history for biblical exegesis

and in several case studies it relates these insights to particular texts Few topics are more central to the task of biblical interpretation than history and few books open up the subject in so illuminating and thought provoking a manner as this splendid collection of essays and responses Hugh Williamson Regius Professor of Hebrew University of Oxford England breaks new ground in its interdisciplinary examination of the methodology presuppositions practices and purposes of biblical hermeneutics with a special emphasis on the relation of faith and history Eleonore Stump Robert J Henle Professor of Philosophy Saint Louis University United States This volume holds great promise for the full fledged academic recovery of the Bible as Scripture It embodies an unusual combination of world class scholarship historic Christian orthodoxy bold challenges to conventional wisdom and the launching of fresh new ideas Al Wolters Professor of Religion and Theology Redeemer University College Ontario Canada The essays presented here respect the need and fruitfulness of a critical historiography while beginning the much needed process of correcting the philosophical tenets underlying much modern and postmodern biblical research The result is a book that mediates a faith understanding both theoretical and practical of how to read the Bible authentically as a Christian today Francis Martin Chair Catholic Jewish Theological Studies John Paul II Cultural Center Washington D C Not only is history central to the biblical story but from a Christian perspective history revolves around Jesus Christ All roads of human activity before Christ lead up to him and all roads after Christ connect with him A concern with history and God s action in it is a central characteristic of the Bible The Bible furnishes us with an account of God s interactions with people and with the nation of Israel that stretches down the timeline from creation to the early church It tells us of real men women and children real circumstances and events real cultures places languages and worldviews And it shows us God at work in human affairs revealing his character and heart through his activities Behind the Text examines the correlation between history and the Bible For the scholar student and informed reader of the Bible this volume highlights the importance of history for biblical interpretation and looks at how history has and should influence interpretation Library of Universal History and Popular Science ... Israel Smith Clare,1910 **Energy Miracles** H.B.

Glushakow,2022-04-27 It makes no difference whether global warming is or is not a human caused condition because it is only human caused action that will mediate its effects This book shows why wind and solar alone are not enough To get a handle on this we need a backup plan that is an energy miracle This is the book that gives concerned folks an understanding of exactly how to tackle global warming At the same time it gives students and scientists the tools to jump start the search for energy miracles The politicians and administrators who need a low cost solution that comes to grips with the coming debacle will be happy to know that this book provides that as well In this century over one billion people living in low lying coastal areas will be inundated by rising seas It s time to get moving Read this book and then pass it on to a friend or an associate **Theology, History, and Biblical Interpretation** Darren Sarisky,2015-01-29 The Christian Bible serves as the sacred scripture of the Christian community It is read regularly by many people around the world today as it has been for

centuries But how should one interpret this text This reader presents a variety of perspective on how to relate historical and theological considerations when approaching the Bible It encourages students and scholars to ponder how historical and theological categories shape one's view of three crucial realities the text of the Bible the human subject who reads the text and the nature of the exchange between the two in the practice of reading As historical and theological categories are applied to these realities are they mutually exclusive or can they be combined in some way This reader encourages students and scholars to explore these important questions by bringing together a selection of some of modernity's most influential discussions of the issues as well as some of the present day's most distinguished attempts to weigh in on the debate

*Science, Reason, and Faith* Fr. Robert Spitzer, SJ, 2023-09-18 Built into our very nature is a desire to know about the world around us The big questions of human existence are inescapable Who am I Why am I here and where am I going Why is there evil in the world What is the meaning of life This yearning for truth ultimately leads us to our Creator God knows the longings of the human heart and he reveals himself to us through creation through Scripture and ultimately through the Incarnation Because God the Son became man we have a person to look to in our pursuit of truth Jesus Christ himself who is Truth Christ helps us see that truth is not just the object of science and reason but what animates the mysterious and loving power of faith In *Science Reason and Faith* Fr Robert Spitzer SJ explores in depth the Bible and the intersection of three realms that the secular world tells us are separate and incompatible Fr Spitzer draws the modern reader's attention to the many seeming conflicts between science reason and Catholic teaching By tackling these difficult questions he shows that it is precisely through the integration of science reason and faith that we can truly discover ourselves our world and our God

**A History of the Warfare of Science with Theology in Christendom, Vol. II (in Two Volumes)** Andrew D. White, 2010-01-01 The battle between science and religion in American popular life is as old as America itself By the late 19th century it had reached a fever pitch culminating in the two volume 1896 work *A History of the Warfare of Science with Theology in Christendom* The result of thirty years of research by historian and educator ANDREW DICKSON WHITE 1832 1918 a founder of Cornell University this is White's attack on intellectually stifling religious dogma and his explication of the conflict thesis of outright warfare between science and religion While scholars today generally see the situation as more nuanced the conflict thesis remains a popular metaphor in the mind of the general public and White's work continues to speak to us today H L Mencken called this one of the noblest monuments of American scholarship and it will fascinate anyone who is troubled by the ongoing influence by religious authorities into secular science In Volume II White looks at the shift from miracles to medicine from demonic possession to insanity and other modern transformations of humanity's understanding of the world and ourselves

Methodological naturalism is the thesis that only natural features can be factored into any legitimate explanation Moreover the thesis contends any attempt to explain natural phenomena by appealing to supernatural features is unscientific and therefore illegitimate This book argues that nothing inherently problematic afflicts possible appeals to supernatural agency in the attempt to explain select phenomena in nature Reputable philosophers of the ancient and medieval periods as well as prominent scientists of the early modern era invoked supernatural agency in their attempts to understand nature For them miraculous interventions in nature by a supernatural agent were not unreasonable However the super naturalistic worldview has been replaced by methodological naturalism The assumptions of two pivotal figures David Hume and Charles Darwin brought about this change This book shows that this change was motivated by unscientific means Hence the change itself remains inconsistent with the assumptions of methodological naturalism
