**The Panda's Thumb** Stephen Jay Gould, 2010-11-29 Gould is a natural writer he has something to say and the inclination and skill with which to say it P B Medawar New York Review of Books With sales of well over one million copies in North America alone the commercial success of Gould's books now matches their critical acclaim The Panda's Thumb will introduce a new generation of readers to this unique writer who has taken the art of the scientific essay to new heights Were dinosaurs really dumber than lizards Why after all are roughly the same number of men and women born into the world What led the famous Dr Down to his theory of mongolism and its racist residue What do the panda's magical thumb and the sea turtle's perilous migration tell us about imperfections that prove the evolutionary rule The wonders and mysteries of evolutionary biology are elegantly explored in these and other essays by the celebrated natural history writer Stephen Jay Gould Mismeasure of Man (Revised and Expanded) Stephen Jay Gould, 2006-06-17 The definitive refutation to the argument of The Bell Curve When published in 1981 The Mismeasure of Man was immediately hailed as a masterwork the ringing answer to those who would classify people rank them according to their supposed genetic gifts and limits And yet the idea of innate limits of biology as destiny dies hard as witness the attention devoted to The Bell Curve whose arguments are here so effectively anticipated and thoroughly undermined by Stephen Jay Gould In this edition Dr Gould has written a substantial new introduction telling how and why he wrote the book and tracing the subsequent history of the controversy on innateness right through The Bell Curve Further he has added five essays on questions of The Bell Curve in particular and on race racism and biological determinism in general These additions strengthen the book's claim to be as Leo I Kamin of Princeton University has said a major contribution toward deflating pseudo biological explanations of our present social woes

Typecasting Stuart Ewen, Elizabeth Ewen, 2011-01-04 Typecasting chronicles the emergence of the science of first impression and reveals how the work of its creators early social scientists continues to shape how we see the world and to inform our most fundamental and unconscious judgments of beauty humanity and degeneracy In this groundbreaking exploration of the growth of stereotyping amidst the rise of modern society authors Ewen Ewen demonstrate typecasting as a persistent cultural practice Drawing on fields as diverse as history pop culture racial science and film and including over one hundred images many published here for the first time the authors present a vivid portrait of stereotyping as it was forged by colonialism industrialization mass media urban life and the global economy Studying the Image Eloise

Meneses, 2019-03-26 The field of anthropology provides rich insights into the world of people and cultures But it also presents challenges for Christians in the areas of cultural relativism evolutionary theory race and ethnicity forms of the family governments and war life in the global economy the morality of art and religious pluralism Most significantly it raises questions regarding the truth and how we can know it This book provides the opportunity to investigate such questions with both the informed understanding of anthropological theory and ethnography and the larger framework and commitment of

Christian biblical and theological studies So equipped readers are encouraged to investigate for themselves the depths and intricacies of topics in anthropology that are especially relevant for Christians The Fashioned Self Joanne Finkelstein, 2013-04-24 This book examines the nature of the self and self identity in the modern age and the way in which they have been moulded through the alteration of bodily appearance exemplified fashions facelifts and diets The idea that an individual's character is revealed through physical appearance is Finkelstein argues deeply embedded in Western culture And since fashions and cosmetics are closely linked to sexual difference the author concentrates on aspects of gender identity suggesting that the female and male identity are differentiated through opposed experiences of the body <u>Culture</u> Jessica Evans, Stuart Hall, 1999-07-06 This collection of classic essays in the study of visual culture fills a major gap in this new and expanding intellectual field Its major strength is its insistence on the importance of three central aspects of the study of visual culture the sign the institution and the viewing subject It will provide readers teachers and students with an essential text in visual and cultural studies Janet Wolff University of Rochester Visual Culture provides an invaluable resource of over 30 key statements from a wide range of disciplines including four editorial essays which place the readings in their historical and theoretical context Although underpinned by a focus on contemporary cultural theory this Reader puts the study of visual culture and the rhetoric of the image at centre stage Divided into three parts Cultures of the Visual Regulating Photographic Meaning and Looking and Subjectivity the Reader enables students to make hitherto unmade connections between art film and photography history and theory history semiotics and communications media studies and cultural theory Visual Culture sets the agenda for the study of Visual Culture and will be essential reading for researchers and students alike Focus On: 100 Most Popular American Agnostics Wikipedia contributors, In Defense of an **Evolutionary Concept of Health** Mahesh Ananth, 2017-11-30 One of the most controversial contemporary debates on the concept of health is the clash between the views of naturalists and normativists Naturalists argue that although health can be valued or disvalued the concept of health is itself objective and value free In contrast normativists argue that health is a contextual and value laden concept and that there is no possibility of a value free understanding of health This debate has fueled many of the often very acrimonious disputations arising from the claims of health disease and disability activists and charities and the public policy responses to them In responding to this debate Ananth both surveys the existing literature with special focus on the work of Christopher Boorse and argues that a naturalistic concept of health drawing on evolutionary considerations associated with biological function homeostasis and species design is defensible without jettisoning norms in their entirety Bully for Brontosaurus: Reflections in Natural History Stephen Jay Gould, 2010-11-29 Provocative and delightfully discursive essays on natural history Gould is the Stan Musial of essay writing He can work himself into a corkscrew of ideas and improbable allusions paragraph after paragraph and then uncoiling hit it with such power that his fans know they are experiencing the game of essay writing at its best John Noble Wilford New York Times

**Book Review** Clever as a Fox Sonja Ingrid Yoerg, 2002 Researched Clever as a Fox will challenge your previously held notions about animals and the measure of intelligence both theirs and ours THE CHURCH OF JESUS CHRIST OF LATTER-DAY SAINTS AND SCIENCE Joseph Mark Holmes, 2024-05-23 The first section of the trilogy deals with epistemology The approaches to determine what is true in the author's religion and science use are discussed and shown to be somewhat similar The fundamental beliefs of both religion and science are based on metaphysical assumptions that cannot be proven true with empirical evidence In the second part of the trilogy seven essential metaphysical assumptions of the author's faith are discussed They are shown to be reasonable beliefs based on respected theories of quantum physics relativity the big bang superstrings evolution psychology geology and anthropology. The third section of the trilogy deals with beliefs about the creation of the earth Each of the seven days of the creation story in Genesis are reinterpreted based on the finding of science and beliefs of the LDS Church This includes a form of evolution and pre Adamic man It is consistent with the writer s religious faith **The Body** Mariam Fraser, Monica Greco, 2020-07-24 The body has become an increasingly significant concept in recent years and this Reader offers a stimulating overview of the main topics perspectives and theories surrounding the issue This broad consideration of the body presents an engagement with a range of social concerns from the processes of racialization to the vagaries of fashion and performance art enacted as surgery on the body Individual sections cover issues such as the body and social dis order bodies and identities bodily norms bodies in health and dis ease bodies and technologies Containing an extensive critical introduction contributions from key figures such as Butler Sedgwick Martin Scheper Huges Haraway and Gilroy and a series of introductions summarizing each section this Reader offers students a valuable practical guide and a thorough grounding in the fascinating topic of the body Leaving the Cave Pat Duffy Hutcheon, 1996-05-31 How can one explain the general failure of the social sciences to accumulate reliable knowledge According to Pat Duffy Hutcheon the social sciences have failed us in the twentieth century Practitioners in the social realm such as politicians therapists educators and economists are unable to provide the answers we seek to meet the challenges of our everyday lives and the next millennium In Leaving the Cave Hutcheon explores the reasons for this failure In this pioneering study of the development of social and biological evolutionary theory she contends that for the first time in history there exists a paradigm capable of integrating the life sciences and the social behavioural sciences a model to make effective social science a reality To illustrate her arguments Hutcheon traces the development of a current of thought she identifies as evolutionary naturalism She focusses on the lives and writings of those thinkers who have most illuminated this philosophy from the Hellenic Greeks through the works of the early pioneers of modern social scientific thought to the social theorists of the late nineteenth and twentieth centuries whose ideas have been firmly rooted in the Darwinian and Pavlovian revolutions in biology and neuroscience Leaving the Cave is an innovative multidisciplinary study of the development of social science the philosophy of evolutionary naturalism and the effect of each on the other Certain to arouse controversy this is a book

which everyone concerned for the future of the social sciences will want to read Rebuilding the Matrix Denis Alexander, 2003 Fresh thinking and new insights on the nature of science in relation to faith showing particularly that 1 true science does not need to be and in fact is not hostile to religious faith and 2 evangelical Christians in general need not be either fearful of nor hostile toward scientific endeavor **Stephen Jay Gould and the Politics of Evolution** David F. **Discovering Complexity** William Bechtel, Robert C. Richardson, 2010-08-06 An analysis of two heuristic strategies for the development of mechanistic models illustrated with historical examples from the life sciences In Discovering Complexity William Bechtel and Robert Richardson examine two heuristics that guided the development of mechanistic models in the life sciences decomposition and localization Drawing on historical cases from disciplines including cell biology cognitive neuroscience and genetics they identify a number of choice points that life scientists confront in developing mechanistic explanations and show how different choices result in divergent explanatory models Describing decomposition as the attempt to differentiate functional and structural components of a system and localization as the assignment of responsibility for specific functions to specific structures Bechtel and Richardson examine the usefulness of these heuristics as well as their fallibility the sometimes false assumption underlying them that nature is significantly decomposable and hierarchically organized When Discovering Complexity was originally published in 1993 few philosophers of science perceived the centrality of seeking mechanisms to explain phenomena in biology relying instead on the model of nomological explanation advanced by the logical positivists a model Bechtel and Richardson found to be utterly inapplicable to the examples from the life sciences in their study Since then mechanism and mechanistic explanation have become widely discussed In a substantive new introduction to this MIT Press edition of their book Bechtel and Richardson examine both philosophical and scientific developments in research on mechanistic models since 1993 Species, Serpents, Spirits, and Skulls Sherrie Lynne Lyons, 2010-07-02 Science permeates nearly every aspect of our lives and yet as current debates over intelligent design the causes of global warming and alternative health practices indicate the question of how to distinguish science from pseudoscience remains a difficult one To address this question Sherrie Lynne Lyons draws on four examples from the nineteenth century sea serpent investigations spiritualism phrenology and Darwin's theory of evolution Each attracted the interest of prominent scientists as well as the general public yet three remained at the edges of scientific respectability while the fourth evolutionary theory although initially regarded as scientific heresy ultimately became the new scientific orthodoxy Taking a serious look at the science behind these examples Lyons argues that distinguishing between science and pseudoscience particularly in the midst of discovery is not as easy as the popular image of science tends to suggest Two examples of present day controversies surrounding evolutionary psychology and the meaning of fossils confirm this assertion She concludes that although the boundaries of what constitutes science are not always clear cut the very intimate relationship between science and society rather than being a hindrance contributes to the richness and diversity of

scientific ideas Taken together these entertaining and accessible examples illuminate important issues concerning the theory New Horizons in Medical Anthropology Margaret Lock, Mark Nichter, 2003-09-02 practice and content of science These cutting edge essays and case studies on issues like AIDS medical technologies and overpopulation are collected here in honour of Charles Leslie the influential anthropologist "Art, Sex and Eugenics " Anthea Callen, 2017-07-05 This book reveals how art and sex promoted the desire for the genetically perfect body Its eight chapters demonstrate that before eugenics was stigmatized by the Holocaust and Western histories were sanitized of its prevalence a vast array of Western politicians physicians eugenic societies family leagues health associations laboratories and museums advocated through verbal and visual cultures the breeding of the master race Each chapter illustrates the uncanny resemblances between models of sexual management and the perfect eugenic body in America Britain France Communist Russia and Nazi Germany both before and after the Second World War Traced back to the eighteenth century anatomy lesson the perfect eugenic body is revealed as athletic hygienic pure blooded and sexually potent This paradigm is shown to have persisted as much during the Bolshevik sexual revolution as in democratic nations and fascist regimes Consistently posed naked these images were unashamedly exhibitionist and voyeuristic Despite stringent legislation against obscenity not only were these images commended for soliciting the spectator's gaze but also for motivating the spectator to act out their desire An examination of the counter archives of Maori and African Americans also exposes how biologically racist eugenics could be equally challenged by art Ultimately this book establishes that art inculcated procreative sex with the Corpus Delecti the delectable body healthy wholesome and sanctioned by eugenicists for improving the Western race Women, Travel, and Science in Nineteenth-Century Americas Nina Gerassi-Navarro, 2017-11-15 This book offers a new and insightful look at the interconnections between the United States Brazil and Mexico during the nineteenth century Gerassi Navarro brings together U S and Latin American Studies with her analysis of the travel narratives of Frances Calder n de la Barca and Elizabeth Cary Agassiz Inspired by the writings of Alexander von Humboldt these women in their travels expand his views on the tropics to include a social dimension to their observations on nature culture race and progress in Brazil and Mexico Highlighting the role of women as a new kind of observer as well as the complexity of connections between the United States and Latin America Gerassi Navarro interweaves science politics and aesthetics in new transnational frameworks
