Management as Consultancy Andrew Sturdy, Christopher Wright, Nick Wylie, 2015-02-19 The nature of management is changing managers are becoming more like consultants focusing on projects functional integration change and clients This timely book is based on a large scale international study of new management practices and examines the emergence of consultant managers It breaks new ground in our understanding of this hybrid role uncovering working practices identities and occupational dynamics to shed light on both management and consultancy It unpacks the changing relationship between external consultants and management to reveal important implications for the future of consultancy Both private and public sectors are covered with a focus on managers in large and multinational organisations such as former consultants and those in specialisms such as human resource management who adopt consulting roles In addition to advancing our understanding of changes in management this book offers a demystifying view of consultancy as a whole from one of the largest ever studies of this occupation

Management Consultancy Andrew Sturdy, Karen Handley, Timothy Clark, Robin Fincham, 2010-06-10 Management consultants are typically seen as key mediators in the flow of management ideas And yet little is known about exactly what happens when they work together with clients behind closed doors in consulting projects Do they really innovate or simply legitimate existing knowledge This book presents research from a three year long fly on the wall study of consulting projects and challenges our taken for granted view of consultancy It draws on and integrates theories of knowledge and social boundaries to reveal a picture of complex and shifting insider outsider relationships Here the outsider or expert status of consultants in relation to their clients cannot be assumed in their day to

day project interactions Different actors roles and types of knowledge are involved in an interactive and dynamic process where various boundaries are constructed reinforced negotiated and transformed The chapters selectively explore these dynamics revealing the importance of boundary complexity the role of humour and challenge in often tense relationships and the importance of shared knowledge domains such as sector knowledge This in depth analysis of inter organizational project teams also covers a wide range of consultancy contexts drawing on cases studies which include a US based strategy firm and a multinational client the public and private sectors a sole practitioner consultant IT implementation in financial services The book is important for all those with an interest in management consultancy project working and management knowledge as well as in innovation change inter organisational relations boundaries and professional services The authors include some of the leading research experts on management consultancy as well as a former management consultant and current expert in management learning
