Hargreaves, 2019-04-11 Provocative and engagingly written

Beyond Schooling offers a challenging perspective on State schooling in England and the unrelenting increase in centralisation from the late 1960s until the present day Exploring how the education of our children and young people should be recaptured from the State as the country moves into a precarious future this book argues that any fundamental reconsideration of schooling has much to learn from an anarchist analysis introduces readers unfamiliar with anarchism to the main themes of this political philosophy and practice and their relationship to the political left and right shows how an anarchist perspective on education raises deep issues about the community and the use of power questions the notions of full time schooling and age grading alongside conventional conceptions of the teaching profession and the potential educational role of parents as work declines or disappears In its original reflections on the state of contemporary schooling and the paths to future reform Beyond Schooling is a must read for anyone seeking a new vision for the future of education and schooling

**Free Schools, Free People** Ronald J. Miller, 2002-07-17 This first historical account of the free school movement of the 1960s documents the formation of hundreds of small independent schools across the United States that marked a turning point in American education The book revisits and interprets the radical democratic educational vision behind those schools through the works of some of the authors of that time such as John Holt A S Neill Paul Goodman and George Dennison These authors and the thousands of educators parents and young people who took part in the free school movement passionately advocated for students intellectual and psychological freedom and for their autonomy and individuality in a society they saw as increasingly standardized and corporately managed Although free school ideology was renounced during the conservative restoration of the 1970s and 1980s and the once popular literature is now largely forgotten Miller argues that radical educational critique is especially relevant in today s educational climate in light of the standards movement high stakes testing school violence and its suppression and corporate influence over the curriculum

**Selling Out Education** Stephanie Allais, 2014-08-07 Selling Out Education argues that basing education policy on qualifications and learning outcomes dramatized by the phenomenal expansion of qualifications frameworks is misguided Qualifications frameworks are intended to make education more responsive to the needs of economies and societies by improving how qualifications and credentials are used in labour markets But using learning outcomes as the starting point of education programmes neglects the core purpose of education giving people access to bodies of knowledge

they would not otherwise have Furthermore instead of creating demand for skilled workers through industrial and economic policy qualifications frameworks are premised on the flawed idea that a supply of skilled workers leads to industrial and economic development And skilled workers are to be supplied not by encouraging governments to focus attention on creating improving and supporting education institutions but by suggesting that governments take a quality assurance role As a result in poor countries where provision is weak to start with qualifications have been created and institutions established to monitor providers without increasing or improving education provision The weaknesses of many current policy approaches make clear Allais argues that education is inherently a collective good and that the acquisition of bodies of knowledge provide the basis for its integrity and intelligibility *Understanding and Using Challenging Educational Theories* Karl Aubrey, Alison Riley, 2024-08-30 Introducing 20 key educational thinkers who have offered challenging perspectives on education Exploring Their ideas how to apply them in practice and their relevance to teaching and learning today Understanding The strengths and limitations of each theory and links to other concepts This third edition includes Two new chapters on the works of Diane Ravitch and Gloria Ladson Billings Revamped reflective tasks with a greater practical focus for the classroom Fully updated chapters with links to current educational socio political developments and expanded critical commentary This is an essential textbook for any university course that includes learning theory with particular relevance for initial teacher education education studies and early childhood degrees Karl Aubrey has recently retired from his post at Bishop Grosseteste University Alison Riley is the Programme Leader for the BA Early Childhood Studies at Bishop Grosseteste University The perfect companion to Aubrey Riley *Understanding and Using Educational Theories* 3e 9781529761306 **John Holt** Adam Dickerson, 2019-05-17 This is the first ever book to offer an analytical study of John Holt s philosophy of education It provides a clear analysis and critical evaluation of the key themes in his work considers the main objections to his views and discusses their relation to the contemporary homeschooling movement The book examines Holt s critique of compulsory education and his account of the relationships between learning freedom intelligence and character It argues that Holt s works contain a philosophically rich critique of instrumentalism in education and thus continue to represent a significant challenge to many mainstream views on education today Given its scope the book will be of interest to anyone who wants to understand Holt s work and influence as a critic of compulsory schooling educators and education students philosophers of education and those seeking a better grasp of the ideas behind unschooling and homeschooling *Trends in Education* ,1978 **The Common School and the Comprehensive Ideal** Mark Halstead, Graham Haydon, 2009-02-23 A topical and provocative volume that invites consideration of the most fundamental issues concerning future educational provision what is the purpose of our schools and what should we do in them Cutting edge research by contributors who are leading figures internationally in philosophy and education for whom these issues have been particular points of concern Includes a substantial keynote essay by leading philosopher of education Richard Pring

educational reforms His work however was not exclusively educational and throughout his life Holmes published on religion philosophy poetry and literature subsuming his educational viewpoint into a much wider philosophy of life His spiritual leanings and call for an improved education system which would draw out the potential for development from within the child inspired successive generations of progressive educators In studying Edmond Holmes in detail this book makes an important contribution to current debates surrounding creativity and the curriculum in particular the need for alternative educational voices within the state system of regulation This book will be key reading for postgraduate students and researchers who are interested in progressive education the history of education and educational policy and politics
