Rollins, Barbara J. Smith, 2015-01-01 With more than 400 projections presented Merrill's Atlas of Radiographic Positioning
and Procedures remains the gold standard of radiographic positioning texts Authors Eugene Frank Bruce Long and Barbara
Smith have designed this comprehensive resource to be both an excellent textbook and also a superb clinical reference for
practicing radiographers and physicians You'll learn how to properly position the patient so that the resulting radiograph
provides the information needed to reach an accurate diagnosis Complete information is included for the most common
projections as well as for those less commonly requested UNIQUE Collimation sizes and other key information are provided
for each relevant projection Comprehensive full color coverage of anatomy and positioning makes Merrill's Atlas the most in
depth text and reference available for radiography students and practitioners Coverage of common and unique positioning
procedures includes special chapters on trauma surgical radiography geriatrics pediatrics and bone densitometry to help
prepare you for the full scope of situations you will encounter Numerous CT and MRI images enhance your comprehension of
cross sectional anatomy and help you prepare for the Registry examination Bulleted lists provide clear instructions on how to
correctly position the patient and body part when performing procedures Summary tables provide quick access to projection
overviews guides to anatomy pathology tables for bone groups and body systems and exposure technique charts Frequently
performed projections are identified with a special icon to help you focus on what you need to know as an entry level
radiographer Includes a unique new section on working with and positioning obese patients Offers coverage of one new
compensating filter Provides collimation sizes and other key information for each relevant projection Features more CT and
MRI images to enhance your understanding of cross sectional anatomy and prepare you for the Registry exam Offers
additional digital images in each chapter including stitching for long length images of the spine and lower limb Standardized
