Rainforest Ancient Realm Of The Pacific:

Rainforest Graham Osborne,1998 With their towering spruces and cedars verdant groundcover and cloaks of mist the temperate rainforests of North America have long been a source of wonder and awe Extending from northern California to southern Alaska these immense and mysterious forests are home to a constellation of life that is unique on this planet In this magnificent photographic collection Graham Osborne's breathtaking images depict the many guises of the rainforest gnarled tree trunks dripping with moss the spires of Douglas firs reaching into the sky waterfalls tumbling over time worn rocks ice encased fern fronds in winter scarlet maple leaves littering the ground in autumn a burst of wildflowers along a river bank in spring In his eloquent text Wade Davis describes the scale and abundance of these rainforests where redwoods reach nearly 120 meters and red cedars can be 6 metres or more across at the base Davis also discusses the role of the rainforest in Native culture and mourns the loss of much of this ancient forest through overcutting and other shortsighted forestry practices Together Davis's powerful writing and Osborne's spectacular photographs provide a stunning tribute to this rare and beautiful ecosystem as well as a compelling plea to preserve it

Islands of Rainforest Edvard Hviding, Tim Bayliss-Smith, 2018-05-08 This title was first published in 2000 An original and thought provoking analysis of modern initiatives in the tropical rain forest While issues such as logging eco timber eco tourism have been widely analyzed from an outsider s perspective this book considers them from the local people s viewpoint in terms of a long history of the rainforest uses The authors demonstrate that the relationship of indigenous people to the tropical forest is not essentially timeless nor is it primarily spiritual or mystical It is in fact firmly connected to modern realities while still being rooted in historical beliefs and practices Standing at the intersection of anthropology historical geography and rainforest ecology and also at the interface of the local and the global this ethnographically grounded study dispels a number of commonly held assumptions It reveals how processes of impact are actually two way interactions as local communities in Melanesia incorporate industries like logging into rapidly evolving post colonial society and economy
