Rangeland Reform '94, 1993 *The Governance of Rangelands* Pedro M. Herrera, Jonathan Davies, Pablo Manzano Baena, 2014-10-10 Rangelands are large natural landscapes that can include grasslands shrublands savannahs and woodlands They are greatly influenced by and often dependent on the action of herbivores In the majority of rangelands the dominant herbivores are found in domestic herds that are managed by mobile pastoralists Most pastoralists manage their rangelands communally benefitting from the greater flexibility and seasonal resource access that common property regimes can offer As this book shows this creates a major challenge for governance and institutions This work improves our understanding of the importance of governance how it can be strengthened and the principles that underpin good governance in order to prevent degradation of rangelands and ensure their sustainability It describes the nature of governance at different levels community governance state governance international governance and the unique features of rangelands that demand collective action issues of scale ecological disequilibrium and seasonality A series of country case studies is presented drawn from a wide spectrum of examples from Africa the Middle East Central Asia Europe and North America These provide contrasting lessons which are summarised to promote improved governance of rangelands and pastoralist livelihoods

Rangeland Systems David D. Briske, 2017-04-12 This book is open access under a CC BY NC 2.5 license This book provides an unprecedented synthesis of the current status of scientific and management knowledge regarding global rangelands and the major challenges that confront them It has been organized around three major themes The first summarizes the conceptual advances that have occurred in the rangeland profession The second addresses the implications of these conceptual advances to management and policy The third assesses several major challenges confronting global rangelands in the 21st century This book will compliment applied range management textbooks

by describing the conceptual foundation on which the rangeland profession is based It has been written to be accessible to a broad audience including ecosystem managers educators students and policy makers The content is founded on the collective experience knowledge and commitment of 80 authors who have worked in rangelands throughout the world Their collective contributions indicate that a more comprehensive framework is necessary to address the complex challenges confronting global rangelands Rangelands represent adaptive social ecological systems in which societal values organizations and capacities are of equal importance to and interact with those of ecological processes A more comprehensive framework for rangeland systems may enable management agencies and educational research and policy making organizations to more effectively assess complex problems and develop appropriate solutions

Rangeland Management Series: Livestock Management During Drought , Rangeland Health National Research Council, Board on Agriculture, Committee on Rangeland Classification, 1994-02-01 Rangelands comprise between 40 and 50 percent of all U S land and serve the nation both as productive areas for wildlife recreational use and livestock grazing and as watersheds The health and management of rangelands have been matters for scientific inquiry and public debate since the 1880s when reports of widespread range degradation and livestock losses led to the first attempts to inventory and classify rangelands Scientists are now questioning the utility of current methods of rangeland classification and inventory as well as the data available to determine whether rangelands are being degraded These experts who are using the same methods and data have come to different conclusions This book examines the scientific basis of methods used by federal agencies to inventory classify and monitor rangelands it assesses the success of these methods and it recommends improvements The book s findings and recommendations are of interest to the public scientists ranchers and local state and federal policymakers
