E. H. Carr and International Relations Charles Jones, 1998-10 E H Carr is widely remembered as an influential theorist of international relations The scourge of inter war idealists he became the best known Briton in a generation of predominantly American political realists But Carr's realism differed greatly from that of his contemporaries a vigorous advocate of social and economic planning and friend of the Soviet Union he stood closer to Lenin than to Morgenthau In this book Charles Jones makes sense of Carr's distinctive form of realism by examining his rhetoric and the reciprocal relationship between theory and policy making in his writings Close attention is paid to the period from 1936 when Carr left the Foreign Office through his subsequent career as a one man foreign ministry at Aberystwyth the Ministry of Information and above all The Times culminating in the final frustration of his schemes for continued British world power in 1947

Scientific Methods of Inquiry for Intelligence Analysis Hank Prunckun, 2014-09-08 Since 9 11 the needs of intelligence agencies as well as the missions they conduct have increased in number size and complexity As such government and private security agencies are recruiting staff to analyze the vast amount of data collected in these missions This textbook offers a way of gaining the analytic skills essential to undertake intelligence work It acquaints students and analysts with how intelligence fits into the larger research framework It covers not only the essentials of applied research but also the function structure and operational methods specifically involved in intelligence work It looks at how analysts work with classified information in a security conscious environment as well as obtain data via covert methods Students are left with little doubt about what intelligence is and how it is developed using scientific methods of inquiry This revised edition of the popular text has been expanded and updated significantly

Impediments to the Prevention and Intervention of Genocide Samuel Totten, 2013 Academics NGOs the United Nations and individual nations are focused on the prevention and intervention of genocide Traditionally missions to prevent or intervene in genocide have been sporadic and under resourced The contributors to this volume consider some of the major stumbling blocks to the avoidance of genocide Bartrop and Totten

argue that realpolitik is the major impediment to the elimination of genocide Campbell examines the lack of political will to confront genocide and Theriault describes how denial becomes an obstacle to intervention against genocide Loyle and Davenport discuss how intervention is impeded by a lack of reliable data on genocide violence and Macgregor presents an overview of the influence of the media Totten examines how the UN Convention on Genocide actually impedes anti genocide efforts and how the institutional configuration of the UN is itself often a stumbling block Addressing an issue that is often overlooked Travis examines the impact of global arms trade on genocide Finally Hiebert examines how international criminal prosecution of atrocities can impede preventive efforts and Hirsch provides an analysis of the strengths weaknesses and effectiveness of major international and national prescriptions developed over the last decade The result is a distinguished addition to Transaction's prestigious Genocide Studies series

The War Puzzle Revisited John A. Vasquez, 2009-07-23 A scientific explanation of the onset and expansion of war and the conditions of peace

The Killing Trap Manus I. Midlarsky, 2005-10-20 The Killing Trap offers a comparative analysis of the genocides politicides and ethnic cleansings of the twentieth century which are estimated to have cost upwards of forty million lives The book seeks to understand both the occurrence and magnitude of genocide based on the conviction that such comparative analysis may contribute towards prevention of genocide in the future Manus Midlarsky compares socio economic circumstances and international contexts and includes in his analysis the Jews of Europe Armenians in the Ottoman Empire Tutsi in Rwanda black Africans in Darfur Cambodians Bosnians and the victims of conflict in Ireland The occurrence of genocide is explained by means of a framework that gives equal emphasis to the non occurrence of genocide a critical element not found in other comparisons and victims are given a prominence equal to that of perpetrators in understanding the magnitude of genocide

International Norms and the Resort to War Gregory A. Raymond, 2020-08-27 This book offers a fresh perspective on timeless questions concerning anarchy and order power and principle and public and private morality by taking a novel approach to the study of the onset of war Rather than looking at the distribution of wealth military might or other material capabilities to explain the onset of war this book focuses instead on how international norms affect the use of military force Critical of the realist assumption that international legal norms are unable to curb hostilities without a powerful central authority to enforce their injunctions it contends that the normative context within which national leaders act sets the tone for world politics by communicating commonly accepted understandings about the limits of permissible action Using quantitative analyses of the relationships between war initiation norms and various types of armed conflict the author calls into question realist beliefs regarding international norms demonstrating that restrictive normative orders reduce the likelihood of war

Methods of Inquiry for Intelligence Analysis Hank Prunckun, 2019-04-12 Few professions have experienced change to the same extent as has intelligence Since the 9 11 attacks the role of intelligence has continued to grow and its mission remains complex Government and private security agencies are recruiting intelligence analysts in ever higher numbers to process what has

become a voluminous amount of raw information and data. Methods of Inquiry for Intelligence Analysis offers students the means of gaining the analytic skills essential to undertake intelligence work and the understanding of how intelligence fits into the larger research framework. It covers not only the essentials of applied research but also the function, structure and operational methods specifically involved in intelligence work.

The Prevention and Intervention of Genocide Samuel Totten, 2008-03-31. This volume is comprised of over 2 300 annotations on a wide array of issues and topics germane to the subject of preventing the atrocities of genocide and managing these conflicts when they do arise. Samuel Totten brings together in one comprehensive collection the research and findings in various fields such as political science, sociology, history and psychology to enable specialists in genocide studies, peace studies and conflict resolution to benefit from the insights of a diverse range of scholars and foster an understanding of how the various components of genocide studies connect. Among the topics included are key conventions, international treaties and covenants, genocide, early warning signals and forecasting risk, data bases, sanctions, peacekeeping missions, conflict resolution, the International Criminal Court, realpolitik vis vis the issue of genocide prevention and intervention, key non governmental agencies, key governmental and UN bodies working on these important issues. In addition to the annotations, Totten frames the bibliography with a major essay that introduces the reader to the subject of prevention and intervention of genocide, raising a host of critical issues regarding the strengths, weaknesses and limitations of various approaches germane to issues of managing these conflicts.

How Realist Is India's National Security Policy? Kanti Bajpai, 2023-03-30. In managing national security, how Realist is India in terms of cultivating and using power and especially military power? A conventional view of India is that it has been uncomfortable with realism or power politics as a guide to policy. This volume shows that it has been more realist than is generally recognized and that it has increasingly become comfortable with power in the service of its interests. The essays in this volume examine the different aspects and types of realism in India's national security policy. Include a range of perspectives from academics as well as former military officers and diplomats. Focus on India's military and foreign policy in dealing with China, Pakistan, the United States, Southeast Asia and West Asia. This key volume will be indispensable to scholars and researchers of politics and international relations, defence and strategic studies and South Asian studies and to government officials, journalists and general readers interested in the external dimensions of India's national security.

The Emergence of Noopolitik John Arquilla, David Ronfeldt, Dionne Barnes-Proby, Elizabeth Williams, John Christian, 1999-04-15. Strategy at its best knits together ends and means no matter how various and disparate into a cohesive pattern. In the case of a U S information strategy, this requires balancing the need to guard and secure access to many informational capabilities and resources with the opportunity to achieve national aims by fostering as much openness as practicable. The authors term to represent such strategic balancing is guarded openness. They go on to describe noopolitik, nu oh poh li teek, an emerging form of statecraft that emphasizes the importance of sharing ideas and values globally, principally through the exercise of

persuasive soft power rather than traditional military hard power This study discusses the opportunities that may be raised by the emergence of noopolitik ranging from construction of a noosphere a globe spanning realm of the mind to recommendations that for example the U S military should begin to develop its own noosphere among and between the services as well as with U S allies In the area of international cooperation the authors offer strategic approaches for improving the capacity of state and nonstate actors to work together to address transnational problems In addition the authors recommend specific doctrinal developments implied by the emergence of information strategy including the pressing need to deal with such ethical concerns as the first use of information weapons concepts of proportional response and the need to maintain the immunity of noncombatants Ultimately the authors call for an innovative turn of mind as policymakers and strategists rethink how best to adapt to the epochal transformations being wrought by the information revolution *The Global Community Yearbook of International Law and Jurisprudence 2022* Giuliana Ziccardi Capaldo,2023-09-05 The 2022 edition of The Global Community Yearbook of International Law and Jurisprudence constitutes the only thorough annual survey of major developments in international courts General Editor Giuliana Ziccardi Capaldo selects excerpts from important court opinions supported by contributors who provide expert guidance on those cases The topical organization and subject index make the thorough comprehensive content easy to navigate

War on Terrorism Alan O'Day,2017-09-08 President George W Bush maintained in his address of 20 September 2001 that the successful prosecution of the war against terrorism will require the judicious use of every resource at our command every means of diplomacy every tool of intelligence every instrument of law enforcement every financial influence and every necessary weapon of war Unlike the Cold War the War on Terrorism is neither a battle against some ideology nor bounded by physical boundaries or conventional political units such as nation states The War on Terrorism is the internationalisation or rather globalisation of previous wars Terror is not a nation and the enemies in such wars are not nations any regime such as Libya simply by repudiating terrorism can become an ally of the anti terror coalition Regimes that continue to practice terrorism against domestic opponents qualify to participate in the wider war if they conform to certain norms in external affairs The 28 articles reprinted here consider aspects of that most amorphous of animals the War on Terrorism They do not set out to provide all of the answers nor do they radiate a unified vision of what constitutes the war on terrorism the pieces begin from a range of political and intellectual outlooks Taken as a group however the difficulties of determining the limits and nature of the war on terrorism receive important attention The authors address several major themes within the war on terrorism what falls within its perimeters its shifting manifestations implications responses and future directions

Routledge Handbook of Public Diplomacy Nancy Snow,Philip M. Taylor,2008-11 The Routledge Handbook of Public Diplomacy provides a comprehensive overview of public diplomacy and national image and perception management from the efforts to foster pro West sentiment during the Cold War to the post 9 11 campaign to win the hearts and minds of the Muslim world Editors Nancy Snow and Philip Taylor present

Harmony and War Yuan-kang Wang, 2010-12-15 Confucianism has shaped a certain perception of Chinese security strategy symbolized by the defensive nonaggressive Great Wall Many believe China is antimilitary and reluctant to use force against its enemies It practices pacifism and refrains from expanding its boundaries even when nationally strong In a path breaking study traversing six centuries of Chinese history Yuan kang Wang resoundingly discredits this notion recasting China as a practitioner of realpolitik and a ruthless purveyor of expansive grand strategies Leaders of the Song Dynasty 960 1279 and Ming Dynasty 1368 1644 prized military force and shrewdly assessed the capabilities of China s adversaries They adopted defensive strategies when their country was weak and pursued expansive goals such as territorial acquisition enemy destruction and total military victory when their country was strong Despite the dominance of an antimilitarist Confucian culture warfare was not uncommon in the bulk of Chinese history Grounding his research in primary Chinese sources Wang outlines a politics of power that are crucial to understanding China s strategies today especially its policy of peaceful development which he argues the nation has adopted mainly because of its military economic and technological weakness in relation to the United States History and Class Consciousness Georg Lukacs, 1972-11-15 This is the first time one of the most important of Luk cs early theoretical writings published in Germany in 1923 has been made available in English The book consists of a series of essays treating among other topics the definition of orthodox Marxism the question of legality and illegality Rosa Luxemburg as a Marxist the changing function of Historic Marxism class consciousness and the substantiation and consciousness of the Proletariat Writing in 1968 on the occasion of the appearance of his collected works Luk cs evaluated the influence of this book as follows For the historical effect of *History and Class Consciousness* and also for the actuality of the present time one problem is of decisive importance alienation which is here treated for the first time since

Marx as the central question of a revolutionary critique of capitalism and whose historical as well as methodological origins are deeply rooted in Hegelian dialectic. It goes without saying that the problem was omnipresent. A few years after *History and Class Consciousness* was published it was moved into the focus of philosophical discussion by Heidegger in his *Being and Time*, a place which it maintains to this day largely as a result of the position occupied by Sartre and his followers. The philologic question raised by L. Goldmann who considered Heidegger's work partly as a polemic reply to my admittedly unnamed work need not be discussed here. It suffices today to say that the problem was in the air particularly if we analyze its background in detail in order to clarify its effect: the mixture of Marxist and Existentialist thought processes which prevailed especially in France immediately after the Second World War. In this connection priorities, influences and so on are not particularly significant. What is important is that the alienation of man was recognized and appreciated as the central problem of the time in which we live by bourgeois as well as proletarian, by politically rightist and leftist thinkers. Thus *History and Class Consciousness* exerted a profound effect in the circles of the youthful intelligentsia.
