Genetic Criticism Dirk Van Hulle, 2022-02-24 In *Genetic Criticism* Dirk Van Hulle introduces the study of creative processes to an Anglophone audience As a method in the study of literary writing processes genetic criticism is also a reading strategy The idea behind this book is to introduce this strategy to a broader audience from interested readers and graduate students to early career researchers and literary critics In literary studies it is often obvious that a particular work somehow seems to hit a nerve but more challenging to pinpoint exactly why it works This book therefore starts from a clear basic assumption knowing how something was made can help us understand how and why it works This strategy is at the basis of many disciplines including art history By means of X ray technology or hyperspectral imaging it is possible to look at a painting as a multilayered object with not only spatial dimensions but also a temporal one This temporal dimension is the core of the reading strategy introduced in this book Note books marginalia manuscripts and typescripts even if one works with scans give a concrete dimension to literature which is a helpful reading strategy for many students On the one hand this involves concrete transferrable skills such as aspects of transcription and digital scholarly editing On the other hand it also involves more abstract theoretical issues relating to matters of authorship collaboration authority agency intention and intertextuality

Always Already New Lisa Gitelman, 2008-08-29 In *Always Already New* Lisa Gitelman explores the newness of new media while she asks what it means to do media history Using the examples of early recorded sound and digital networks Gitelman challenges readers to think about the ways that media work as the simultaneous subjects and instruments of historical inquiry Presenting original case studies of Edison's first phonographs and the Pentagon's first distributed digital network the ARPANET Gitelman points suggestively toward similarities that underlie the cultural definition of records phonographic and not at the end of the nineteenth century and the definition of documents digital and not at the end of the twentieth As a result *Always Already New* speaks to present concerns about the humanities as much as to the emergent field of new media studies Records and documents are kernels of humanistic thought after all part of and party to the cultural impulse to preserve and interpret Gitelman's argument suggests inventive contexts for humanities computing while also offering a new perspective on such traditional humanities disciplines as literary history Making extensive use of archival sources Gitelman describes the ways in which recorded sound and digitally networked text each emerged as local anomalies that were yet deeply embedded within the reigning logic of public life and public memory In the end Gitelman turns to the World Wide Web and asks how the history of the Web is already being told how the Web might also resist history and how using the Web might be producing the conditions of its own

historicity **Worlds Made Flesh** Lauryn Mayer, 2004-06-01 This book focuses on the use of the past in two senses First it looks at the way in which medieval texts from the eighth to the fifteenth centuries discussed the past how they presented history what kinds of historical narratives they employed and what anxieties gathered around the practice of historiography Second this study examines twentieth century interactions with this textual past and the problems that have arisen for critics trying to negotiate this radically different textual culture Lauryn Mayer examines chronicle histories that have been largely ignored by scholars bringing these neglected texts into dialogue with contemporaneous canonical works such as *Troilus and Criseyde* *The House of Fame* *the Morte Darthur* *Beowulf* and *The Battle of Maldon* **Genetic Joyce** Daniel Ferrer, 2023-05-30 Using genetic criticism an approach focused on the materiality of the writing process this book shows how the creative process of modernist writer James Joyce can be reconstructed from his manuscripts **The Complete Poetry of Percy Bysshe Shelley** Percy Bysshe Shelley, 2012-07-01 Winner of the 2013 Richard J Finneran Award Society for Textual Scholarship Outstanding Academic Title Choice His name is Percy Bysshe Shelley and he is the author of a poetical work entitled *Alastor or the Spirit of Solitude* With these words the radical journalist and poet Leigh Hunt announced his discovery in 1816 of an extraordinary talent within a new school of poetry rising of late The third volume of the acclaimed edition of *The Complete Poetry of Percy Bysshe Shelley* includes *Alastor* one of Shelley's first major works and all the poems that Shelley completed for either private circulation or publication during the turbulent years from 1814 to March 1818 *Hymn to Intellectual Beauty* *Mont Blanc* *Laon* and *Cythna* as well as shorter pieces such as his most famous sonnet *Ozymandias* It was during these years that Shelley already an accomplished and practiced poet with three volumes of published verse authored two major volumes earned international recognition and became part of the circle that was later called the Younger Romantics As with previous volumes extensive discussions of the poems composition influences publication circulation reception and critical history accompany detailed records of textual variants for each work Among the appendixes are Mary W Shelley's 1839 notes on the poems for these years a table of the forty two revisions made to *Laon* and *Cythna* for its reissue as *The Revolt of Islam* and Shelley's errata list for the same It is in the works included in this volume that the recognizable and characteristic voice of Shelley emerges unmistakable consistent and vital **Handbook of Stemmatology** Philipp Roelli, 2020-09-07 Stemmatology studies aspects of textual criticism that use genealogical methods to analyse a set of copies of a text whose autograph has been lost This handbook is the first to cover the entire field encompassing both theoretical and practical aspects of traditional as well as modern digital methods and their history As an art *ars* stemmatology's main goal is editing and thus presenting to the reader a historical text in the most satisfactory way As a more abstract discipline *scientia* it is interested in the general principles of how texts change in the process of being copied Thirty eight experts from all of the fields involved have joined forces to write this handbook whose eight chapters cover material aspects of text traditions the genesis and methods of traditional Lachmannian textual criticism and the objections

raised against it as well as modern digital methods used in the field The two concluding chapters take a closer look at how this approach towards texts and textual criticism has developed in some disciplines of textual scholarship and compare methods used in other fields that deal with descent with modification The handbook thus serves as an introduction to this interdisciplinary field

The Book as Artefact, 2005-01-01 Books do not just contain texts books themselves are cultural artefacts which convey many meanings in their own right meanings which interact with the texts they contain Awareness of the many significances of books as cultural and textual objects reshapes the traditional disciplines of textual theory analytic bibliography codicology and palaeography while the advent of electronic books and digital methods for representing print books is introducing a new dimension to our understanding Seven essays in this volume ranging over medieval Portuguese and Swedish manuscripts eighteenth century Icelandic editions Australian playtexts Thackeray and Anita Brookner and Stefan George consider these questions from the broad perspective of textual scholarship Texts may exist on the borderland of word and not word or they may spring from borderlands of nation or culture or they may be considered from the margins of neighbouring disciplines So readers must set the texts within contexts to see the play of text against border Essays in this volume explore different texts against varying backgrounds Pound's Cantos Joyce's Ulysses Trollope's An Eye for an Eye Woolf's The Waves while essays by McGann and Lernout argue the dimensionality of text on the intersection of print and digital media Implicit in all these essays is the contention that textual scholarship must influence literary interpretation Two final essays focus directly on this in the cases of Melville's Moby Dick and Emily Dickinson's late fragments An extensive reviews section completes this volume

Shimmering in a Transformed Light Rosemary Lloyd, 2005 Although much has been written lately on the links between painting and writing little or no attention has been paid to those moments in literature when the narrative stops to allow for the description of those objects we associate with still life Rosemary Lloyd's book shows how fascinating this overlooked area is how rich in suggestions of class race and gender how much it indicates about human pleasures and about the experience of space and time Lloyd focuses on the last two centuries particularly at points marked by the irruption of images of contingency and rapid change into the fields of art for example the year of the Terror in French history the decade in which Haussman's politically driven transformation of Paris led Baudelaire to write his great modernist poem Le Cygne and on or about December 1910 the date to which Virginia Woolf attributes a revolution in the definition of literary character Lloyd's central concern lies with the ways in which the still life written or painted both evokes and attempts to deal with the sense of contingency While she makes frequent reference to paintings she focuses above all on written still lifes particularly those moments when novels pause to address the subject matter of still life a bowl of fruit a hat rack a desk cluttered with pens and papers in ways that invite contemplation of other and broader cultural domains She draws on literary and art works from Australia England France Germany Ireland Italy and the United States

The Work of Revision Hannah Sullivan, 2013-01-01 Revision might seem to be an intrinsic part of good writing But Hannah Sullivan argues that we inherit our faith in the virtues of redrafting from early twentieth century modernism Closely examining changes made in manuscripts typescripts and proofs by T S Eliot Ezra Pound Ernest Hemingway James Joyce Virginia Woolf and others she shows how modernist approaches to rewriting shaped literary style and how the impulse to touch up alter and correct can sometimes go too far In the nineteenth century revision was thought to mar a composition s originality a prejudice cultivated especially by the Romantics who believed writing should be spontaneous and organic and that rewriting indicated a failure of inspiration Rejecting such views avant garde writers of the twentieth century devoted themselves to laborious acts of rewriting both before and after publishing their work The great pains undertaken in revision became a badge of honor for writers anxious to justify the value and difficulty of their work In turn many of the distinctive effects of modernist style ellipsis fragmentation parataxis were produced by zealous experimental acts of excision and addition The early twentieth century also saw the advent of the typewriter It proved the ideal tool for extensive multi stage revisions superior even to the word processor in fostering self scrutiny and rereading across multiple drafts Tracing how master stylists from Henry James to Allen Ginsberg have approached their craft The Work of Revision reveals how techniques developed in the service of avant garde experiment have become compositional orthodoxy
