Novels in the English Classroom Alissa Burger, 2017-10-09 This collection highlights the diverse ways comics and graphic novels are used in English and literature classrooms whether to develop critical thinking or writing skills paired with a more traditional text or as literature in their own right From fictional stories to non fiction works such as biography memoir history or critical textbooks graphic narratives provide students a new way to look at the course material and the world around them Graphic novels have been widely and successfully incorporated into composition and creative writing classes introductory literature surveys and upper level literature seminars and present unique opportunities for engaging students multiple literacies and critical thinking skills as well as providing a way to connect to the terminology and theoretical framework of the larger disciplines of rhetoric writing and literature Reading Graphic Novels Achim Hescher, 2016-02-22

Distinguishing the graphic novel from other types of comic books has presented problems due to the fuzziness of category boundaries Against the backdrop of prototype theory the author establishes the graphic novel as a genre whose core feature is complexity which again is defined by seven gradable subcategories 1 multilayered plot and narration 2 multireferential use of color 3 complex text image relation 4 meaning enhancing panel design and layout 5 structural performativity 6 references to texts media and 7 self referential and metafictional devices Regarding the subcategory of narration the existence of a narrator as known from classical narratology can no longer be assumed In addition conventional focalization cannot account for two crucial parameters of the comics image what is shown point of view including mise en scene and what is seen character perception On the basis of Francois Jost's concepts of ocularization and focalization this book presents an analytical framework for graphic novels beyond conventional narratology and finally discusses aspects of subjectivity a focal paradigm in the latest research It is intended for advanced students of literature scholars and comics experts *Italian as a foreign language: Teaching and acquisition in higher education* Alberto Regagliolo, 2023-10-10 This manual focuses on teaching Italian as a foreign language in the academic field taking into consideration the various subjects and disciplines that can be found in a university course in Italian Studies Various chapters are included within that range for example from Italian phonetics and dialectology to art as a means to deepen elements of the Italian language to morphology with word formations

and to translation as well as subtitling The range also covers technology as a tool for telecollaboration academic writing and learning Italian through geography or the language of vulgarity Besides the manual takes into consideration the use of the Italian press for learning together with the use of comics and cartoons to teach the Italian language The contribution aims to be a point of reference both for teachers and students who are focusing on linguistics philology didactics and pedagogy It lays emphasis on the teaching methodology the instruments of teaching and the available resources It also seeks to deal with the various teaching problems and reflects on the disciplines as well as alternative proposals for teaching
