ICRP Publication 92 ICRP, 2003-12-12 The effect of ionising radiation is influenced by the dose the dose rate and the quality of the radiation Before 1990 dose equivalent quantities were defined in terms of a quality factor Q_L that was applied to the absorbed dose at a point in order to take into account the differences in the effects of different types of radiation In its 1990 recommendations the ICRP

introduced a modified concept For radiological protection purposes the absorbed dose is averaged over an organ or tissue T and this absorbed dose average is weighted for the radiation quality in terms of the radiation weighting factor w_R for the type and energy of radiation incident on the body The resulting weighted dose is designated as the organ or tissue equivalent dose HT The sum of the organ equivalent doses weighted by the ICRP organ weighting factors w_T is termed the effective dose E Measurements can be performed in terms of the operational quantities ambient dose equivalent and personal dose equivalent These quantities continue to be defined in terms of the absorbed dose at the reference point weighted by Q L

Radiation Biology of Medical Imaging Charles A. Kelsey, Philip H. Heintz, Gregory D. Chambers, Daniel J. Sandoval, Natalie L. Adolphi, Kimberly S. Paffett, 2014-02-10 This book provides a thorough yet concise introduction to quantitative radiobiology and radiation physics particularly the practical and medical application Beginning with a discussion of the basic science of radiobiology the book explains the fast processes that initiate damage in irradiated tissue and the kinetic patterns in which such damage is expressed at the cellular level The final section is presented in a highly practical handbook style and offers application based discussions in radiation oncology fractionated radiotherapy and protracted radiation among others The text is also supplemented by a Web site

Radiological and Nuclear Terrorism P. Andrew Karam, 2021-03-10 This book discusses multiple aspects of radiological and nuclear terrorism Do you know what to do if there is a radiological or nuclear emergency in your city These accidents are not common but they have happened and even though we have not seen an attack using these weapons governments around the world are making plans for how to prevent them and for how to respond if necessary Whether you are an emergency responder a medical caregiver a public health official even a member of the public wanting to know how to keep yourself and your loved ones safe there is a need to understand how these weapons work how radiation affects our health how to stop an attack from taking place how to respond appropriately in the event of an emergency and much more Unfortunately the knowledge that is needed to accomplish all of this is lacking at all levels of society and government In this book Dr Andrew Karam an internationally respected expert in radiation safety and multiple aspects of radiological and nuclear emergencies discusses how these weapons work and what they can do how they can affect our health how to keep yourself safe and how to react appropriately whether you are a police officer investigating a suspect radiological weapon a firefighter responding to a radiological or nuclear attack a nurse or physician caring for potentially contaminated patients or a governmental official trying to keep the public safe To do this he draws upon his extensive experience in the military the several years he worked directly with emergency responders his service on a number of advisory committees and multiple trips overseas in the aftermath of the Fukushima accident and on behalf of the International Atomic Energy Agency Interpol and the Health Physics Society
