combines two years of reports on China's environment from the view of civil society. With a special focus on natural and unnatural disasters, the book also covers the themes of pollution and ecological protection, urban environmental issues and livability, sustainable consumption policy and governance, civil society and public participation, and China and the world in an environmental perspective. In this volume, readers are brought up to date on the main environmental issues and events of 2010 and 2011. Beginning in 2010, debris flows, landslides, and droughts brought about considerable debate on the human factors involved in natural disasters and on China's urban growth mode. The concept of urban livability is discussed within the backdrop of the waste and water crises. Several environmental incidents, including the Bohai Bay oil spill and the chromium slag pollution incident in Qijing, are also explored within the book. Meanwhile, increased public participation and environmental information transparency give reason for hope. Other articles include research and analysis on China's investments in Africa, its struggling environmental courts, public interest litigation, the controversial Xiaonanhai dam, and others on the Mekong River, green supply chains, and the PM2.5 debate. The Chicago American Giants Paul

Debono, 2007-01-01 In 1886 a semipro team known as the Union Baseball Club was founded in Chicago. Under the leadership of Frank Leland, this team of black players worked its way to the top of Chicago's otherwise all-white semipro city league. In 1902 Leland recruited a talented young pitcher from Texas, Rube Foster, who soon established himself as one of the game's outstanding players, seized the leadership of the Union Baseball Club, and founded the Chicago American Giants. This team would dominate the early years of the Negro National League, also founded by Foster. Covering the years 1870-1953, this is a history of a legendary Negro League team. Sources include contemporary newspaper articles and interviews with veteran players. Many photographs, a comprehensive biographical dictionary, and a detailed game log are included. **Puzzles of**

Government Formation Rudy W. Andeweg, Lieven De Winter, Patrick Dumont, 2011-04-05 Understanding the formation of governments has always been central to political science. Traditionally, this topic has been considered from a rational choice theory perspective, and the empirical testing of these theories, however, neither approach alone is able to explain a large proportion of actual coalition formations. This comparative volume brings together a rational choice theory perspective and the empirical testing of these theories to study government formation. It provides in-depth studies of government formations in Europe that cannot be accounted for by existing coalition theory in order to identify potential explanatory factors that have been neglected so far. These coalition puzzles are reconstructed by country experts based on secondary sources, newspaper accounts, internal party documents, and interviews in an effort to understand why particular governments were formed. In conclusion, this book assesses whether new factors can be integrated into rational choice theories or whether these analyses point to the need for a different paradigm. This important volume will be of interest to students and scholars of political science, European politics, and comparative politics. *Directory of Social Agencies of New York, 1926* *Civil War*
