

The background of the cover is a light blue-grey gradient, overlaid with various faint, semi-transparent chemical structures and reaction schemes. These include a Friedel-Crafts alkylation reaction at the top left, a Fischer projection of a chiral molecule on the left, a Newman projection of a molecule on the right, and a reaction involving a carbonyl compound and a nucleophile at the bottom left. The main title is centered in a large, orange, sans-serif font, with the subtitle below it in a smaller, black, sans-serif font.

Organic Chemistry

A Brief Course

A large, stylized orbital diagram is positioned in the lower half of the cover. It features a central, dark grey, textured sphere representing the nucleus. Numerous black, elliptical lines represent electron shells or orbitals, spiraling outwards in a complex, overlapping pattern. Interspersed among these lines are many small, bright orange-yellow spheres, which likely represent electrons or specific atoms within the orbital structure.
