

A full-page photograph of a surfer in a red shirt and dark shorts riding a white surfboard on a massive, curling blue wave. The surfer is positioned in the center-left of the frame, leaning forward. The wave's crest is breaking over the surfer, creating a tunnel-like effect. The water is a deep blue, and the spray of the wave is white. The overall mood is dynamic and powerful.

All-Stars and Movie Stars Ron Briley, Michael K. Schoenecke, Deborah A. Carmichael, 2021-05-11 Sports films are popular forms of entertainment around the world but beyond simply amusing audiences they also reveal much about class race gender sexuality and national identity In All Stars and Movie Stars Ron Briley Michael K Schoenecke and Deborah A Carmichael explore the interplay between sports films and critical aspects of our culture examining them as both historical artifacts and building blocks of ideologies values and stereotypes The book covers not only Hollywood hits such as Field of Dreams and Miracle but also documentaries such as The Journey of the African American Athlete and international cinema such as the German film The Miracle of Bern The book also explores television coverage of sports commenting on the relationship of media to golf and offering a new perspective on the culture and politics behind the depictions of the world s most popular pastimes The first part of the book addresses how sports films represent the cultural events patterns and movements of the times in which they were set as well as the effect of the media and athletic industry on the athletes themselves Latham Hunter examines how the baseball classic The Natural reflects traditional ideas about gender heroism and nation and Harper Cossar addresses how the production methods used in televised golf affect viewers The second section deals with issues such as the growth of women s involvement in athletics

sexual preference in the sports world and the ever present question of race by looking at sports classics such as Rocky Hoosiers and A League of Their Own Finally the authors address the historical and present day role sports play in the international and political arena by examining such films as Visions of Eight and The Loneliness of the Long Distance Runner This important and unique collection illuminates the prominent role that sports play in society and how that role is reflected in film Analysis of the depiction of sports in film and television provides a deeper understanding of the appeal that sports hold for people worldwide and of the forces behind the historic and cultural traditions linked to sports

Groovy Science David Kaiser, W. Patrick McCray, 2016-05-31 Did the Woodstock generation reject science or re create it An enthralling study of a unique period in scientific history New Scientist Our general image of the youth of the late 1960s and early 1970s is one of hostility to things like missiles and mainframes and plastics and an enthusiasm for alternative spirituality and getting back to nature But this enlightening collection reveals that the stereotype is overly simplistic In fact there were diverse ways in which the era's countercultures expressed enthusiasm for and involved themselves in science of a certain type Boomers and hippies sought a science that was both small scale and big picture as exemplified by the annual workshops on quantum physics at the Esalen Institute in Big Sur or Timothy Leary's championing of space exploration as the ultimate high Groovy Science explores the experimentation and eclecticism that marked countercultural science and technology during one of the most colorful periods of American history Demonstrate s that people and groups strongly ensconced in the counterculture also embraced science albeit in untraditional and creative ways Science Each essay is a case history on how the hippies repurposed science and made it cool For the academic historian Groovy Science establishes the deep mark on American culture made by the countercultural innovators For the non historian the book reads as if it were

infected by the hippies democratic intent no jargon few convoluted sentences clear arguments and a sense of delight Nature In the late 1960s and 1970s the mind expanding modus operandi of the counterculture spread into the realm of science and sh t got wonderfully weird Neurophysiologist John Lilly tried to talk with dolphins Physicist Peter Phillips launched a parapsychology lab at Washington University Princeton physicist Gerard O Neill became an evangelist for space colonies Groovy Science is a new book of essays about this heady time Boing Boing **Surfing about Music** Timothy J. Cooley,2014-01-02 Roth Family Foundation music in America imprint First printed page Surfing and Social Theory Nicholas J Ford,David Brown,2005-11-16 Drawing on popular surf culture academic literature and the analytical tools of social theory this is the first sustained commentary on the contemporary social and cultural meaning of surfing exploring mind and body emotions and aesthetics *Surfing and Social Theory* Nick Ford,David Brown,2006 Drawing on popular surf culture academic literature and the analytical tools of social theory this is the first sustained commentary on the contemporary social and cultural meaning of surfing exploring mind and body emotions and aesthetics The World in the Curl Peter Westwick,Peter Neushul,2013-07-23 A definitive and highly readable history of surfing and the cultural political economic and environmental consequences of its evolution from a sport of Hawaiian kings and queens to a billion dollar worldwide industry Despite its rebellious outlaw reputation or perhaps because of it surfing occupies a central place in the American and global imagination embodying the tension between romantic counterculture ideals and middle class values between an individualistic communion with nature and a growing commitment to commerce and technology In examining the enduring widespread appeal of surfing in both myth and reality The World in the Curl offers a fresh angle on the remarkable rise of the sport and its influence on modern life Drawing on Peter Westwick and Peter Neushul s expertise as historians of science and technology the environment and the Cold War as well as decades of experience as surfers themselves The World in the Curl brings alive the colorful history of surfing by drawing readers into the forces that fueled the sport s expansion colonialism the military industrial complex globalization capitalism environmental engineering and race and gender roles In an engaging and provocative narrative history from the spread of surfing to the United States to the development of surf culture to the reintroduction of women into the sport to big wave frontiers the authors draw an indelible portrait of surfing and surfers as actors on the global stage Consumer Tribes Avi Shankar,Bernard Cova,Robert Kozinets,2012-06-25 Marketing and consumer research has traditionally conceptualized consumers as individuals who exercise choice in the marketplace as individuals not as a class or a group However an important new perspective is now emerging that rejects the individualistic view and focuses on the reality that human life is essentially social and that who we are is an inherently social phenomenon It is the tribus the many little groups we belong to that are fundamental to our experience of life Tribal Marketing shows that it is not individual consumption of products that defines our lives but rather that this activity actually facilitates meaningful social relationships The social links social relationships are more important than the things brands etc

The aim of this book is therefore to offer a systematic overview of the area that has been defined as cultures of consumption consumption microcultures brand cultures brand tribes and brand communities It is though these that students of marketing and marketing practitioners can begin to genuinely understand the real drivers of consumer behaviour It will be essential to everyone who needs to understand the new paradigm in consumer research brand management and communications management
