Ruling Minds Erik Linstrum, 2016-01-04 The British Empire used intelligence tests laboratory studies and psychoanalysis to measure and manage the minds of subjects in distant cultures Challenging assumptions about the role of scientific knowledge in the exercise of power Erik Linstrum shows that psychology did more to reveal the limits of imperial authority than to strengthen it **Intelligent Environments 2017** C. Analide, P. Kim, 2017-08-18 The term Intelligent Environments IEs refers to the physical spaces in which IT and other pervasive computing technologies are integrated and used to achieve specific goals for the user the environment or both The ultimate objectives of IEs are enriching user experience enabling better management and increasing user awareness of that environment This book presents the proceedings of the 13th International Conference on Intelligent Environments held in Seoul Korea in August 2017 The conference provides a multidisciplinary collaborative forum for researchers and practitioners from computer science electronic engineering building architecture art and design sociology government and education to present theoretical and practical results related to the development and applications of Intelligent Environments IE 17 focuses on the development of advanced Intelligent Environments as well as other newly emerging and rapidly evolving topics The book also includes the proceedings of the following associated workshops held during the first 2 days of the conference which emphasize the multidisciplinary and transversal aspects of IEs the 6th International Workshop on the Reliability of Intelligent Environments WoRIE 17 the 1st International Workshop on Intelligent Systems for Agricultural Production and Environmental Protection ISAPEP 17 the 1st Workshop on Citizen Centric Smart Cities Solutions CCSCS 17 and the 1st International Workshop on Advanced Multiple Access in Mobile Telecommunications AMAMT 17 Providing a state of the art overview of the discipline this book will be of interest to professionals from a diversity of fields whose work involves the development or application of Intelligent Environments **Intelligent Environments 2020** Carlos A. Iglesias, Jose Ignacio Moreno Novella, Alessandro Ricci, Diego Rivera Pinto, Dumitru Roman, 2020-08-15 Intelligent Environments IEs aims to empower users by enriching their experience raising their awareness and enhancing their management of their surroundings The term IE is used to describe the physical spaces where ICT and pervasive technologies are used to achieve specific objectives for the user and or the environment The growing IE community from academia and practitioners is working on the materialization of IEs driven by the latest technological developments and innovative ideas This book presents the proceedings of the workshops held in conjunction with the 16th International Conference on Intelligent Environments IE2020 Madrid Spain 20-23 July 2020 The conference focused on the development of advanced intelligent environments as well as newly emerging and rapidly evolving topics The workshops included here emphasize multidisciplinary and transverse aspects of IE as well as cutting edge topics

The Empire of Climate David N. Livingstone, 2024-04-16 As the looming consequences of climate change increasingly dominate our visions of the future media coverage and public discourse often focus on how an altered climate will inevitably and unevenly reshape human life across the globe Amid predictions of mass displacement food shortages conflict over resources and widespread health problems many people are newly reckoning with a very old idea that the conditions of our climate will inexorably determine our future This book examines the intellectual architecture of the once widely trafficked belief that climate exerts an ineluctable power over the human species shaping everything from the wealth of nations to human health from the outbreak of hostilities to the evolution of the brain and mental wellbeing The book is organized around four themes health wealth war and mind Each section opens with contemporary anxieties about the influence of an altered climate before tracing the history of these fixations back to much earlier pronouncements on climate s influence Livingstone illustrates how the specter of climatic influence has been used variously to explain interpret and redraw the world and how it played a significant role in the development and justification of some of history s most destructive worldviews He cites examples where climate has been critically implicated in the politics of imperial control labor power and race relations to explain industrial development economic breakdown and market performance as a marker for national character and cultural collapse as an explanation for past warfare and civil conflict today and as a critical factor in psychological disorders patterns of suicide and the prevalence of acute psychosis The book overall traces a powerful set of ideas that has spanned human history and that continue to shape the modern world in various forms to this day

Design Of Intelligent Control Systems Based On Hierarchical Stochastic Automata Pedro Lima, George N Saridis, 1996-03-20 In recent years works done by most researchers towards building autonomous intelligent controllers frequently mention the need for a methodology of design and a measure of how successful the final result is This monograph introduces a design methodology for intelligent controllers based on the analytic theory of intelligent machines introduced by Saridis in the 1970s The methodology relies on the existing knowledge

about designing the different sub systems composing an intelligent machine Its goal is to provide a performance measure applicable to any of the sub systems and use that measure to learn on line the best among the set of pre designed alternatives given the state of the environment where the machine operates Different designs can be compared using this novel approach

Intelligent Learning Environments: The Case of Geometry Jean-Marie Laborde, 2012-12-06 This book is a thoroughly revised result updated to mid 1995 of the NATO Advanced Research Workshop on Intelligent Learning Environments the case of geometry held in Grenoble France November 13 16 1989 The main aim of the workshop was to foster exchanges among researchers who were concerned with the design of intelligent learning environments for geometry The problem of student modelling was chosen as a central theme of the workshop insofar as geometry cannot be reduced to procedural knowledge and because the significance of its complexity makes it of interest for intelligent tutoring system ITS development The workshop centred around the following themes modelling the knowledge domain modelling student knowledge design ing didactic interaction and learner control This book contains revised versions of the papers presented at the workshop All of the chapters that follow have been written by participants at the workshop Each formed the basis for a scheduled presentation and discussion Many are suggestive of research directions that will be carried out in the future There are four main issues running through the papers presented in this book knowledge about geometry is not knowledge about the real world and materialization of geometrical objects implies a reification of geometry which is amplified in the case of its implementation in a computer since objects can be manipulated directly and relations are the results of actions Laborde Schumann This aspect is well exemplified by research projects focusing on the design of geometric microworlds Guin Laborde

Human Assessment and Cultural Factors John W. Berry, S.H. Irvine, 2013-11-11 Against the background of NATO s Istanbul conference of 1971 Cronbach and Drenth 1972 the Kingston conference shows that great progress has been made by the community of cross cultural psychologists The progress is as much in the psychology of the investigators as in the investigations being reported In 1971 the investigators were mostly strangers to each other Behind their reports lay radically different field experiences disparate research traditions and mutually contradictory social ideals Istanbul was not a Tower of Babel but participants did speak past each other Now a community exists thanks to the meetings of NATO and the International Association for Cross Cultural Psychology to flourishing journals and the Triandis et al 1980 Handbook The members tend to know each other can anticipate how their formulations will fall on the ears of others and accept superficially divergent approaches as making up a collective enterprise Ten years ago there was open conflict between those who confronted exotic peoples with traditional tests and applied traditional interpretations to the responses and the relativists who insisted that tasks test taking and interpretation cannot be standardized in the ways that matter Today s investigators are conscious of the need to revalidate tasks carried into alien settings they often prefer to redesign the mode of presentation and to attune the subject to test taking They face the difficulties squarely and recognize that even the best

means of coping are only partially successful

The Sexist Microphysics of Power Nerea Barjola, 2024-05-07 A groundbreaking feminist text that frames our obsession with true crime as a form of sexual terror In 1992 three teenage girls went missing from the small town of Alcázar in Valencia Spain while on their way to a nightclub in a case whose strangeness and brutality continues to draw popular speculation decades later Feminist theorist Nerea Barjola retraces the high profile search to find them and the media frenzy of the ensuing trial to explore our cultural fascination with the harm done to women's bodies The graphic rehearsal of the details in news and media fuels cautionary tales of sexual danger that induce in women a mental map of places they can and cannot go the activities they dare not do Rape is not an individual crime but the expropriation of the female body a threat leveled against a class of potential victims that shifts the burden of staying safe onto their own internalized policing This Barjola argues is the frontline for female transgression freedom and resistance Offering a feminist take on Giorgio Agamben's concept of bare life this riveting case study identifies spaces where women cross beyond social limits a house a party a car into a place where danger is all but inevitable where the state of exception turns into the scene of the crime The Sexist Microphysics of Power builds on Judith Butler's work on performativity Michel Foucault's thinking on the day to day operations of power and Silvia Federici's analysis of the witch hunt to propose a paradigm shift in our understanding of the systemic impact of gender violence and of a culture that relishes in its lurid repetition In 2021 the Spanish government awarded the book a national distinction for the significance of its research for social transformation

Colonial Psychiatry and the African Mind Jock MacCulloch, 1995-01-12 In this first history of psychiatry in colonial Africa Jock MacCulloch describes the clinical approaches of well known European practitioners including Frantz Fanon and Wulf Sachs They operated independently of one another Yet despite their differences they shared a coherent set of ideas about the African Mind based on the colonial notion of African inferiority By exploring the association between settler ideology and psychiatric research this study examines colonial science as a system of knowledge and power

The Study of Society (RLE Social Theory) F.C. Bartlett, 2014-08-21 There is today widespread recognition of the fact that the future of human civilization depends to a high degree upon Man's capacity to understand the forces and factors which control his own behaviour Such understanding must be achieved not only as regards individual conduct but equally as regards the mass phenomena resulting from group contacts which are becoming increasingly intimate and influential Until this present volume nowhere have the three sciences of sociology psychology and social anthropology been properly mobilized to deal with the social problems which yearly grow more pressing The essays in
