Counselling and Psychotherapy in Primary Health Care Jan Wiener,Mannie Sher,1998-11-11 From small beginnings in the 1970s counselling in primary care has now become an established area of practice It is well recognised that a significant proportion of patients in primary health care have psychological difficulties which are treatable at the coal face before they develop into major problems Mental health services can now reach a wider population more quickly with cost effective therapeutic benefits This text examines the intra and inter personal dynamics of primary care essential for counsellors and psychotherapists working in health centres and considers the advantage of multi

disciplinary and multi agency collaboration The progressive approach will be of interest to all who work in primary care They will recognise in it many of their day to day working dilemmas especially in trying to balance the tension between commitment to individual patients and the demands of the wider organisation Case illustrations are used to demonstrate the challenges and teamwork opportunities for both counsellors and doctors who work collaboratively This book is essential reading for counsellors and psychotherapists who work in primary care and for the doctors and health authorities who employ them

Towards a Jungian Theory of the Ego Karen Evers-Fahey,2016-07-15 Despite their prevalence and weight in many of his collected works and letters Jung did not articulate a general theory of the ego and consciousness *Towards a Jungian Theory of the Ego* examines the development of Jung s concept of the ego as he expanded and revised this concept from his earliest formulations about consciousness while a student to his mature thoughts at the end of his life Drawing on Ego Psychology as a theoretical framework Evers Fahey proposes that Jung uses the concept of ego in four distinct ways and that he developed and used his ego concept based on two discrete paradigms These distinctions explain the confusion and ambiguity found when examining the development of Jung s analytical psychology over his lifetime This book provides an examination of ego development and ego defenses based on a unique Jungian standpoint as well as discussion of the relationship between the ego and the Self and the ego and the individuum Furthermore the inclusion of a historical framework helps to place the development of these concepts in context This book proposes a theory of ego psychology based on Jungian theory rather than traditional psychoanalytic theory thereby filling a gap in the knowledge of Jungian theory The book will be essential reading for academics and postgraduate students engaged in the study of Jungian psychology and psychoanalytic theory and will also be valued by those interested in Jung and ego psychology more generally
