 Recycling and Resource Recovery in Industry Analysis Technologies and Implementation provides a definitive and in depth
 discussion of the current state of the art tools and technologies enabling the industrial recycling and reuse of water and other
 resources The book also presents in detail how these technologies can be implemented in order to maximize resource
 recycling in industrial practice and to integrate water and resource recycling in ongoing industrial production processes
 Special attention is given to non process engineering aspects such as systems analysis software tools health regulations life
 cycle analysis economic impact and public participation Case studies illustrate the huge potential of environmental
 technology to optimise resource utilisation in industry The large number of figures tables and case studies together with the
 book s multidisciplinary approach makes Water Recycling and Resource Recovery in Industry Analysis Technologies and
